

ARTESIAN SPAS™
EXPERIENCE THE ULTIMATE

Island Spas™

ADVANCED TECHNOLOGY

GREEN TECHNOLOGY MEANS ENERGY EFFICIENCY

You can relax knowing that luxury and high performance does not mean increased consumption and higher costs. This line of spas uses an energy-efficient circulation system, along with switchless motors, that delivers high performance and reliability. This makes Island Spas more efficient than any traditionally-built spa in the industry.

Environmentally Conscious

- Our **maintenance-free, synthetic Kingwood cabinets** do not rust or warp, reducing the need for replacement.
- **High density Icynene® foam** fills the space between the cabinet and the shell providing the highest level of insulation possible.
- Our spa covers upgraded to **ProGuard** offer the best heat retention available.

Environmentally Friendly Water Treatment

- The **Crystal AOP™** option is the natural way to obtain a crystal clean spa. Using a combination of the Nature2® option, Microfiltration, high efficiency Circulation Pump, UVC, Ozone and ProPure™ Mixer, we are able to achieve maximum water clarity while using far fewer chemicals.
 - The **Crystal ProPure™** option combines the use of the Nature2® option, Ozone Generator, Mazzei Injector, and the ProPure™ Mixing Chamber to concentrate the water purification process.
 - Both systems use the **Nature2®** option, a silver mineral treatment component that screws directly into the micro filter to naturally destroy bacteria and algae, thus reducing the need for chemicals.
- #### WhisperPure™ Circulation System Benefits
- The **WhisperPure™ Circulation System** circulates water through the micro filters and the heater up to 100 times a day. It delivers clean, regulated water 24 hours a day with a low operating cost.

HELIX INSPIRED: A New Spin on Spa Jets

The Island Spas line features a revolutionary breakthrough in hydrotherapy jetting that makes use of the timeless concept of a helix, a curve in three-dimensional space such as that found in a spiral staircase. This Artesian Spas patented jet design provides a truly remarkable hydro-massage. Engineered with the concept of the double helix in mind, the jets use a right-directional spiral on the inside of the cylinder. This causes water to spiral out in a twisting motion, providing jet pulsation and heightened massage pressure.

The two largest helix jets, named **ProHelix™**, provide a high volume of water to massage large muscles in the body. The midsize helix jet, called **TheraHelix™**, is strategically placed in the spa in small groups to massage muscles such the calves, hamstrings, deltoids, biceps, and triceps. The smallest helix jet, the **AccuHelix™**, is placed in large groupings to massage larger regions of the body, such as the entire back. As a complete system, four to five different sizes of helix jets are featured in every Island Spas model.

ADVANCED DIGITAL CONTROL SYSTEM

WiFi Enabled | Color Graphics | Multiple Languages | Easy to Use | Diagnostics

Artesian Spas' next generation spa control system takes spa control to a whole new level. The sleek new design includes a large, easy-to-read back-lit LCD screen, and easy to follow menus. With a simple download from Apple's App Store and Google Play for Android devices, you now have the ability to control your spa system wirelessly!

WORLDWIDE WIFI APP MODULE

The Worldwide App Module option, allows you to access your hot tub using an app on your smart device (Android™ or iPhone®) via a direct connection anywhere in the local proximity of your tub. Gain access anywhere in your house that you can connect to your local WiFi network, or anywhere in the world you have an internet connection to your smart device via 3G, 4G, or WiFi hot spots.

With the app, you can ensure that your hot tub will be ready whenever you want to take a dip. The App provides full interface control so you can set the temperature, turn pumps on and off and even set filtration cycles - all from your smartphone or tablet.

*The app's cloud access cost is free for the 1st 12 months and then \$24 per year after. If not renewed after 12 months, the app will continue to operate in local mode only. *WiFi module purchased separately.

Revitalize Refresh Restore

SKIN REJUVENATION WITH

MICROSILK®

WHY ARE MICRO BUBBLES EFFECTIVE?

The MicroSilk Option enhances the spa experience by creating a luxury oxygen-rich, micro bubble massage that works double time as a deep cleansing and rejuvenating system.

With a simple push of a button, the tub quickly starts to fill up with micro bubbles that appear as a white cloud. The white appearance comes from the billions of anions in each bubble. Anions are the negative charged particles that create the euphoric feeling similar to those found at the base of a waterfall. It is this bubble releasing of the anions that creates a mist and bubbling effect.

Being that these micro bubbles are smaller in size than pores on the skin, it allows dirt to be swept away by the ultra fine bubbles leaving a smooth and silky feeling and providing the following benefits:

- **Increased Hydration** - Increased oxygen results in cellular respiration
- **Enhanced Skin Cell Growth** - Oxygen improves collagen strength
- **Therapeutic levels of anions** - Shown to reduce scars and reduce skin irritations

THE BEAUTY OF MICROSILK® blankets your entire body with billions of oxygen-rich micro bubbles, all the while, giving your skin a luxuriously silky feeling. **MOISTURIZE AND CLEANSE AT THE SAME TIME.** The Micro bubbles enter the pores and lift away any impurities found in the skin, while plumping, hydrating and reducing fine lines and wrinkles. **AN OXYGEN-RICH BATH IS GOOD FOR YOUR HEALTH,** increasing the oxygen levels in the water up to 70%, improving collagen production. **THE POSITIVES OF NEGATIVELY CHARGED IONS,** improves serotonin levels, neutralizing free radicals, while relaxing both the mind and the body.

Oxygen-Rich Micro Bubble Anions Mist Effect

"MicroSilk" felt amazing. It made my skin so soft; I continued to feel it for hours afterwards."
— Debbie F.

The Ultimate Island Spa

There is so much to love about owning our largest Island Spas model. Two full-body lounge seats are handcrafted and molded to support your body in a natural position. The patented, helix inspired jet design provides a double spiral jet pulsation for the ultimate massage. Multiple air and diverter controls allow air variation and altered pressure to adjust massage and comfort level. The cascade waterfall with LED lighting options will turn any backyard into an oasis.

WATER PURIFICATION

Ozone + Dynamic Injector + ProPure™ Mixing Chamber

Crystal ProPure™ Water Purification combines the **Ozonator, Dynamic Injector**, and the **ProPure™ Mixing Chamber**. All components work together to create **AN INNOVATIVE WATER PURIFICATION SYSTEM**.

HOW IT WORKS

- 1 The **Nature2®** option is a patented technology uses silver and copper minerals to naturally destroy bacteria and algae.
- 2 The **Microfiltration** removes contaminants such as dirt, metals, and oil by water passage through a microporus membrane.
- 3 Water is cycled through the high efficiency **Circulation Pump** filtering water up to 30 gallons per minute.
- 4 **Oxygen Molecules** are split by electrodes and then **Oxygen Atoms** unite with other oxygen molecules to produce high output ozone.
- 5 The ozone generator produces ozone and the Dynamic Injector then shoots ozone into the **ProPure Mixing Chamber**, where it mixes with water and air. This chamber keeps the ozone concentrated in a small body of water. The isolated chamber allows the ozone to remain undiluted, hence it can efficiently kill more bacteria, fungi, and viruses than if it was directly injected into the entire spa.
- 6 Water exits the unit and flows into the spa resulting in clean and **Purified** spa water.

Natural • Ultra Clean • Peace of Mind

The Crystal AOP™ ProPure Advanced Oxidation combines the **Nature2®** option, **Microfiltration**, high efficiency **Circulation Pump, UVC, Ozone** and **ProPure™ Mixer** to create the **MOST ADVANCED OXIDATION PROCESS (AOP) FOR WATER PURIFICATION**.

Advanced WATER PURIFICATION™

UVC + Ozone + ProPure™

HOW IT WORKS

- 1 Spa water enters the optional **Nature2®** stick where silver and copper minerals naturally destroy bacteria.
- 2 Contaminants are then trapped in the **Micro Filter**.
- 3 Water is cycled through the high efficiency **Circulation Pump** filtering water up to 30 gallons per minute.
- 4 Air enters unit where the **UV Bulb** converts it to Ozone and Hydroxyls. (Bulb rated 20,000 life hours.)
- 5 Water enters the **AOP™ Unit** through the injector, drawing Ozone and Hydroxyls from the chamber. Static mixer combines water, Ozone and Hydroxyls in a scrambled flow.
- 6 Water irradiated by **Germicidal UVC** converts ozone to Hydroxyl Radicals through **Advance Oxidation Processing**. Contaminants are destroyed by intense Germicidal UVC, Ozone, and Hydroxyl Radicals.
- 7 Water exits the unit to the **ProPure™ Mixer**, where water and air is mixed to keep ozone concentrated and isolated to maximize purification to produce the purest sanitized spa water possible.
