When selecting a HydroPool Swim Spa. The first thing you need to consider is the pump design, make sure the system you choose has enough power to deliver the results you want - whether you are an every day athlete or a triathlete or getting a swim spa for family fun. Next look for a swim jet system that provides the smooth turbulence-free swim current and provides a flow rate that is able to produce a current you expect to swim in. If you need the ability to "Dial In" the resistance that allows the swimmer the ability to customize their swim to achieve the desired results you should consider the AquaTrainer or Executive Trainer models. The adjustability of the current is crucial for a high level swimmer as it allows for interval training while at the same time providing a lower level for all other swimmers.

* Optional upgrade Slave Heater available.
