## To your good

Hydrotherapy, or warm water therapy, in a La-Z-Boy® Spa consists of three main healing components; heat, buoyancy, and massage. Together, they create an exceptional experience that is both relaxing and incredibly healthy. Using a La-Z-Boy Spa on a regular basis provides physical health benefits that go much deeper than just relaxation and pleasure. Water is so pure and simple, yet it can do the most amazing things. Whether you are experiencing joint or muscle pain, have trouble sleeping, or are just plain stressed out, spending time in La-Z-Boy Spa can provide therapeutic

### Reduce Stress, Headaches and Improve Sleep

benefits for just about everyone.

Warm water massage stimulates the body to release endorphins that can significantly reduce stress, La-Z-Boy® Spas hydrotherapy jets also dilate blood vessels to help prevent headaches. In addition, when it comes to falling asleep faster and getting a good night's sleep, the National Sleep Foundation clearly states that "soaking in a Spabefore retiring to bed can ease the transition into a deeper sleep."

### Relieve Muscle and Joint Pain

In recent years the use of hydrotherapy spas by athletes has skyrocketed and La-Z-Boy® Spas are now set to lead the way in offering these benefits to a broader audience! A popular sports magazine said it best: "Your skin and muscles loosen and relax from the increased blood circulation" adding that, if muscles are injured: "A soak in a spa increases blood flow to the injured area, bringing nutrients to help repair the damage."

### health!

#### Soothe Pain Caused by Arthritis

Warm water hydrotherapy treatment in a well designed spa is believed to help those with pain caused by arthritis. It is also thought that hydrotherapy is one method of using water to help treat arthritis with the soothing warmth and buoyancy of the water making it a safe, ideal environment for relieving pain.

### Spend More Time with Family and Friends

How many leisure activities targeted at relaxation can be readily enjoyed at any time, day or night, without ever leaving home? The answer is practically none!

A recent survey of swimming pool owners revealed that many only enjoy their pools a few dozen times a year and jetted bathtubs are also used very infrequently!

That's because pools and bathtubs located in colder parts of the country can't be enjoyed in the spring, autumn or winter and they take too much time and preparation before they can be used.

In contrast, a La-Z-Boy Spa is easy to use and is designed to consistently maintain the water temperature set by the user. As a result, it's always ready and waiting to be used for fun and relaxation - 24 hours a day, 7 days a week, 365 days a year!

#### Help Manage Diabetes

Researchers have reported that hot water and hydrotherapy including the regular use of a spa can help control diabetes. It has also been known to lower blood pressure and significantly reduce blood sugar. A Colorado based study recently revealed that diabetes patients who soaked in a spa for 30 minutes a day, 6 days a week found their average blood sugar level dropped by 13%!

#### Year Round Fun

A recent survey on usage revealed that owners have fun in their spa an average of 150 times a year! Spas are designed to maintain the temperature you set them at and as a result your spa is always ready and waiting for you. Setting the water temperature in a La-Z-Boy<sup>®</sup> Spa is so easy.

While lowering the temperature on a La-Z-Boy Spa helps beat summer heat, there are few moments in life that come close to the sheer pleasure of being surrounded by warm bubbling water on a crisp, cold night.

So, don't worry about the temperature dropping, the sun going down or the seasons changing. Slipping into a La-Z-Boy Spa is always a year round fun and wonderful experience.

### Take a seat.

It has been over 80 years since La-Z-Boy® founders Edwin Shoemaker and Edward Knabusch introduced the world to some of the most comfortable seating known to man. Just like the first La-Z-Boy chairs, La-Z-Boy Spas are engineered to be exceptionally

high quality and the most comfortable underwater seating available anywhere today.

### The Science of Sitting Underwater

La-Z-Boy Spa seating and lounger designs provide exceptional comfort, relaxation and hydrotherapy benefits and are the perfect way to share time with family and friends. By optimizing seating ergonomics, our advanced designs deliver comfort and enhance the delivery of our AquaFlex Hydrotherapy Massage System. Our unique Reclina-Seat balances the weight and position of the occupant to create additional comfort. Our engineering team has also discovered that ideal occupant buoyancy is achieved when reducing the right amount of weight on other parts of their body. Our seats fully support the lumbar/lower back region and the La-Z-Boy Comfort Rest Pillows support the head and provide maximum comfort for stretching back into your seat.

### ience like no other.

Premier Aquaflex Massage technology. It's like having a professional masseuse right in your backyard!

No matter where you need hydrotherapy we've got you covered.

Massage has been shown to have many positive health and well-being benefits including the relief of stress and the promotion of relaxation. Combined with warm water, massage can improve circulation, alleviate tension, allow you to breathe and move more fluidly, assist in improved sleep, and reduce anxiety.

La-Z-Boy Spas exclusive AquaFlex Massage Technology is easily operated by the Personal AquaFlex Control. Conveniently located within comfortable reach of the user, the Personal AguaFlex Control gives you the freedom to select the massage that is just right for you.

The Personal AquaFlex Control gives you the freedom to select the massage you want.

**Relaxation:** 

A marvelous technique to help

instill a meditative state.

### Rest assured.

### It makes cents.

Energy efficiency is top of mind for all consumers and La-Z-Boy® Spas has taken every opportunity to make our spas as efficient as possible. Manufactured to surpass CEC energy efficiency specifications, La-Z-Boy Spas are amongst the most energy efficient spas made today.

The La-Z-Boy Therma-Zone Insulation System delivers the ultimate in energy efficiency while providing mounting space for multiple components and easy access if the spa requires service.

#### We are never at a loss...

La-Z-Boy Spas include a unique and highly efficient immersion electric heating system that maintains the spa's hot water temperature for just a few pennies per day. As an added benefit, the Therma-Zone Insulation System encapsulates the perimeter of the spa creating the ability to utilize the excess heat created by the pump(s) in the spa cavity. This dramatically lowers the spa energy consumption and allows you to enjoy the benefits of hot water and hydrotherapy while saving both money and the environment.

The California Energy Commission (CEC) recognizes La-Z-Boy Spas as an Energy Efficient Appliance.

#### A Professional Masseuse Right in Your Backyard with Premier AquaFlex Massage Technology.

La-Z-Boy Premier Spas feature AquaFlex Massage technology - the ultimate in hot water hydrotherapy. The AquaFlex technology includes state- of-the-art massage jets,

pumps and controls. This cutting edge technology, coupled with the La-Z-Boy Premier Spa Reclina-Seats, allows individual spa users to customize their La-Z-Boy Spa experience. The Personal AquaFlex Controls allow each user to program, at the touch of a button, the type and intensity of their massage. The choices range from soft soothing therapy to full invigorating massages.

The La-Z-Boy Spas customization features include 14 different additional pre-programmed massage patterns lasting up to 15 minutes each and warm up and cool down cycles. Whether you select Deep Tissue, Swedish, Shiatsu or one of the other popular massages options, it's like having a personal masseuse right in your own backyard.

La-Z-Boy Spas exclusive AquaFlex Massage technology is easily operated by the Personal AquaFlex Control which is conveniently located within comfortable reach of the user. The Personal AquaFlex Control gives you the freedom to select the massage that is just right for you, just when you want it.

### La-Z-Boy Water Management System.

The La-Z-Boy Water Management System makes your La-Z-Boy Spa very easy to use and maintain. This high performance system utilizes efficient water management

methodologies that ensure you and your family enjoy safe, clean and clear water.

The La-Z-Boy Water Management System removes unwanted contaminates by an automatic micro-filtering process that is followed by a compressed charge of ozone gas, which oxidizes the dead bacteria and organics and discharges them into the atmosphere. Our Comfort Clean Filtration System automatically operates and scrubs the water to a sparkling shine.

AquaClear Salt Water Management System - Optional

Easy to use and built to last, the AquaClear Salt WaterSystem is one of the most efficient water sanitation systems offered in the spa and hot tub industry today. La-Z-Boy Spas using the AquaClear System need very little maintenance, and the system can be easily installed as an option on all Premier collection models. The system uses sodium bromide (a form of salt) to generate and introduce bromine into the spa water, which rapidly destroys any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by bathers. The AquaClear Salt Water System makes the water feel great and significantly reduces the amount of time required to maintain your La-Z-Boy Spa.

Comfort is our specialty and nobody knows this better than the seating designers and engineers at La-Z-Boy®

Spas. Our Spas feature a unique

seating design that has been crafted to mold to your body enabling you to truly submerse yourself in

the La-Z-Boy Spa experience without "floating to the top." Each Reclina-Seat comes with its own personal AquaFlex Massage control panel and Comfort Massage jets allowing uninterrupted individual

enjoyment and pleasure. In addition, special care has been taken to ensure that La-Z-Boy Spa shell designs not only offer exceptional comfort but also maximize interior space.

Only top quality materials are used to fabricate La-Z-Boy Spas premium acrylic and a third layer of space age fiberglass and resins to ensure maximum comfort, reliability and durability. An overwhelming many doctors agree that relaxation at home is important to effectively reduce stress and the vast majority of doctors (96 percent) agree that sitting at home in a reclining position promotes relaxation.

the Dream Hot Tub features 2 Reclina-Seats On average, doctors recommend about one hour of relaxation each day, in conjunction with other healthy behaviors, to relieve stress. The regular use of a La-Z-Boy Spa Reclina-Seat is a wonderful way to reduce stress, recuperate and relax at the end of a busy day.

Accupressure Neck Massage

Easy to use and built to last, the AquaClear Salt Water System is one of the most efficient water sanitation systems offered in the spa and hot tub industry today. La-Z-Boy Spas using the AquaClear System need very little maintenance, and the system can be easily installed as an option on all Premier collection models. The system uses sodium bromide (a form of salt) to generate and introduce bromine into the spa water, which rapidly destroys any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by bathers. The AquaClear Salt Water System makes the water feel great significantly reduces the amount of time required to maintain your La-Z-Boy Spa.

#### Integrated Support Structure.

La-Z-Boy Premier Spas are constructed with a heavy-duty support structure that is bolted to the Comfort Fit Shell by a fully integrated blocking system. The Integrated Support Structure's low profile design allows for a thicker insulation barrier, which is vulcanized onto the perimeter walls, creating one of the strongest and most energy efficient spas available today.

#### Aquacoustics Surround - Optional.

Stunning electronics and high quality speakers create an exceptional audio experience that is as pleasing to your ears as the spa is to your body.

This exceptional audio system creates an unparalleled entertainment experience which can be enjoyed whether you are using the spa or just simply relaxing outdoors.

#### iCommand System - Optional.

Our innovative La-Z-Boy Spas iCommand allows the user to control the functions of the spa using a smart phone. Simply download and install the Intouch app and ensure that the hot tub is within range of a wireless router and you will be instantly connected! With the optional La-Z-Boy Spas iCommand you can always be in touch with your La-Z-Boy Spa. This is especially useful for frequent travellers and second home or cottage / cabin installations!

Advanced Technology:

Optional Features:

### take confort h signature features that add to your

La-Z-Boy<sup>®</sup> Water Management System.

The La-Z-Boy Water Management System makes your La-Z-Boy Spa very easy to use and maintain. This high performance system utilizes efficient water management methodologies that ensure

you and your family enjoy safe, clean and clear water. The La-Z-Boy Water Management System removes unwanted contaminates by an automatic micro-filtering process that is followed by a compressed charge of ozone gas, which oxidizes the dead bacteria and organics and discharges them into the atmosphere. Our Comfort Clean Filtration System and Circulation Pump automatically operates and scrubs the water to a sparkling shine.

This intake filtration system is powered and digitally controlled by the Mini 24/7 Circulation Pump. The filtration system scrubs and micro-filters the spa water up to 24 hours a day 7 days a week keeping the spa water clean, clear, safe and comfortable. The filtration system has two large capacity cartridge filters that are easily accessible for service.

#### Mini 24 / 7 Circulation Pump

A dedicated mini circulation pump in combination with the dual micro filtration system scrubs the spa water to a brilliant shine to ensure that the water is fresh and ready when you are. The mini circulation pump is an extra energy efficient pump and motor that is designed to deliver strong performance at low operating speeds and at minimal cost. Its high quality and maintenance free design ensures that you can take comfort in knowing that you will receive years of trouble free enjoyment.

#### Ozone Purifier With Treatment Chamber

All La-Z-Boy Spas are equipped with an Ozone Purifier that is highly effective in removing unwanted contaminants from the water by means of an electronic oxidation process. The equipment area houses a corona discharge Ozone Purifier and the system includes a dedicated ozone treatment chamber where the ozone is pressurized for introduction to the water. The Treatment Chamber ensures that the ozone is safe for bathers and performs as effectively as possible.

#### Built In Floor Drain

All La-Z-Boy Spas offer the added convenience of a built-in floor drain.

On a periodic basis, spa water must be drained and refilled. The positioning and size of the drain in your La-Z-Boy Spa will discharge the spa water up to 25 percent faster than competitive brands. The built-in floor drain is effective in draining a high percentage of the water thereby leaving less residual water to bail or vacuum from the bottom of the spa once draining is complete.

#### iCommand System - Optional

Our innovative La-Z-Boy Spas iCommand allows the user to control the functions of the hot tub using an iPad, iPhone or iPod touch. Simply download and install the Intouch app and ensure that the hot tub is within range of a wireless router and you will be instantly connected! With the optional La-Z-Boy Spas iCommand you can always be in touch with your La-Z-Boy Spa. This is especially useful for frequent travellers and second home or cottage / cabin installations!

#### AquaClear Water Management System - Optional

Easy to use and built to last, the AquaClear Salt Water System is one of the most efficient

water sanitation systems offered in the spa and hot tub industry today. La-Z-Boy Spas using the AquaClear System need very little maintenance, and the system can be easily installed as an option on all Signature collection models except the Relax. The system uses sodium bromide (a form of salt) to generate and introduce bromine into the spa water, which rapidly destroys any microbiological contaminants such as waterborne bacteria, algae, and organic matter given off by bathers. The AquaClear Salt Water System makes the water feel great significantly reduces the amount of time required to maintain your La-Z-Boy Spa.

This feature will be music to your ears when your spa is your backyard entertainment center.

Adjustics

AquaÇoustics ound System - Optional

Includes two speakers that are installed right into the

acrylic shell of the spa. Audio functions are controlled directly from the hot tub's topside

electronic controls.

A convenient iPod holder with MP3 input is mounted in the cabinet and a marine grade amplifier turns your iPod into an exceptional spa experience that is as pleasing to your ears as the spa is to your body. The La-Z-Boy® Signature AquaCoustics MP3 Surround

Sound system creates an added level of fun and entertainment in your backyard and can be enjoyed whether using the spa or just relaxing outdoors.

## the Classic spacollection.

the recharge spa the relax spa

# Classic's ample comfort.

Ample comfortable seating and a generous foot well are at the forefront in our increasingly popular Classic Collection Models. Our innovative "Lazy Lounge" and "Comfort Corner" is the perfect way to wind down and relieve stress after a busy day. Simply enjoy the soothing hot water and hydrotherapy for just a few cents per day. There is just no easier way to get into high quality, comfortable, energy efficient and reliable hot water.

### Relax in the Comfort Fit Shell.

Your total comfort is maintained by the seating design

in our Classic Collection the curvature of the seating makes them extremely comfortable. The same special care has been taken to ensure that every aspect of

our shell design maximizes interior space and comfort.

### Integrated Support Structure.

La-Z-Boy Classic Spas also feature a heavy-duty

support structure that is bolted to the Comfort Fit Shell by a fully integrated blocking system.

The Integrated Support Structure's low profile design allows for a thicker insulation barrier. which is vulcanized onto the perimeter walls, creating one of the strongest and truly energy efficient hot tub.

The La-Z-Boy Spa's Water Management System makes

your Classic Collection Spa very easy to use and maintain. This system utilizes efficient water management methodologies that ensure you and your family enjoys safe, clean and clear water.

### Single Micro Filtration System

This intake filtration system has one large capacity cartridge filter that maintains the hot tubs cleanliness. The filtration system scrubs and micro-filters the spa water up to 24 hours a day 7 days a week keeping the water clean, clear and safe.

### Comfortable Seating

### We build spas to last.

Our spas will stand the test of time - not to mention your kids. Our strong, state of the art and fully integrated support structure can handle whatever your family might dish out. La-Z-Boy® Spas are crafted to the highest industry standards with our frames, plumbing, mechanisms, cushions and shells constructed from the finest quality materials. Our spas are comprehensively water tested in our manufacturing facility before being certified to carry the La-Z-Boy name and, just like La-Z-Boy furniture, they are quality tested before they leave our door. Superior quality control is our way of life. So get in, get comfortable and enjoy life.

### We support you all the way with...

Unlike other manufacturers that may offer a limited warranty, La-Z-Boy® Spas offers its customers a 100% No Nonsense, No Fine Print Guarantee to ensure peace of mind and care-free enjoyment.
