

QCA Spas

"A Step Ahead Since 1966"

Indulge
your
Senses

Submerge Yourself

in luxury and *Create* a new lifestyle.

A spa is an investment in a new lifestyle filled with peace, relaxation and memories. Whether it's a mind calming end to your workday or spending quality time with your family and friends, your quality of life will increase. Improve your health and happiness from the many therapeutic benefits of warm, jetted spa water. We invite you to discover for yourself the many advantages of spa ownership and the incomparable quality of a QCA Spa.

Pamper Yourself

as your cares *Gently* fade away.

Just imagine your entire body totally submersed in a warm, bubbling oasis. The weight of the world is lifted from your body. Your mind is at peace and there's no stress. Your blood vessels open to bring rich oxygen and nutrients to your tired, aching muscles and joints. You are totally relaxed and nothing can compare with the tranquility you will feel in a QCA Spa.

Surround Yourself

with quality from a company that's been an
Innovator in spa therapy since 1966

QCA Spas, Inc. has been recognized as one of the oldest spa companies in America. Since 1966, QCA Spas has strived to provide more hydrotherapy in their spas. QCA Spas was the innovator of the patented Wave-Max™ seat, the Hydro Max™ seat and the Ultra Wave™ Lounge. All QCA Spas have been tested and rated by Underwriters Laboratory for your safety and peace of mind. Most recently QCA Spas was featured as one of the top 25 spa companies by *America's Top Hot Tubs & Spas* magazine. Our spas are featured regularly on "The Price is Right" television game show.

NAHB

Rekindle an Old Flame

LED Lighting

Set the ultimate mood with LED lighting. Illuminating through the spa light and strategically placed light elements along the top of the spa and in the spa's seat backs, multiple colors calmly cycle. You can even stop on a particular color you like best.

Sit back, snuggle up together and rekindle the intimacy, the passion and the fire in your relationship. With a QCA Spa you can create a truly romantic environment with LED lighting, waterfall and the Vibra Sound™ Stereo System. Imagine the calm and relaxation of a warm invigorating body massage that will make you forget the stress of your day and concentrate on the love you have shared for many years.

Vibra Sound™ Stereo

QCA Spas uses a 200-watt receiver with seven total speakers. Four VibraSound™ speakers and one sub-woofer built into the spa shell to transmit the sound through the shell and into the water.

A Family Gathering Place

A QCA Spa brings family together into an enjoyable surrounding, where frantic day-to-day activities can be put on hold and quality family time can begin. The open surround seating of a QCA Spa allows everyone to share their day. Youngsters love to play in the whirling waters while teenagers enjoy the social aspects. No matter the age of your children, you owe it to your family to give them a welcome gathering place.

Drink Holders

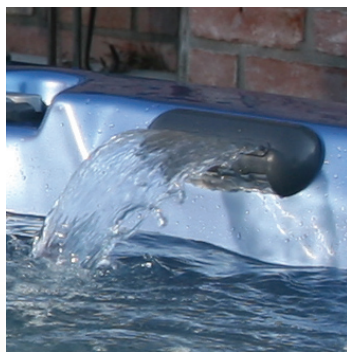

*QCA Spas' attention to ergonomic design goes far beyond the most comfortable seating in the spa industry. We also design useful items such as drink holders in all our spas for easy accessibility for refreshments.**

**Alcoholic Beverages are not recommended while using a spa.*

Create a Whole New Lifestyle

Your home is your favorite place to relax and entertain family and friends. A QCA Spa gives you many reasons for staying home. Whether it's a special occasion, an evening with friends, or just the two of you on a starry night, your QCA Spa provides the ambiance for any occasion with its cascading LED Lit waterfall, Vibra-Sound™ stereo system and full perimeter/underwater LED lighting system. So stay home tonight and create a whole new lifestyle.

The Waterfall

The Waterfall provides physical therapy as well as "peace of mind" therapy as you relax and listen to the soothing cascading water. Just shut your eyes and imagine yourself under a waterfall in a tropical location.

Beautify Your Backyard

It's a fact – homeowners are investing more into their backyards and spending more time at home. Converting grass into outdoor living areas with stone patios, ponds, pools and gardens, a QCA Spa is the perfect addition to your outdoor landscape. The Natural Coastal Grey Cabinet and Pearl Essence spa shell blend with patioscapes and

add elegance to your outdoor showplace. Combine these natural features with modern luxuries of the Aqua Vision TV/DVD/stereo and LED lighting systems and you have the ultimate outdoor relaxation area.

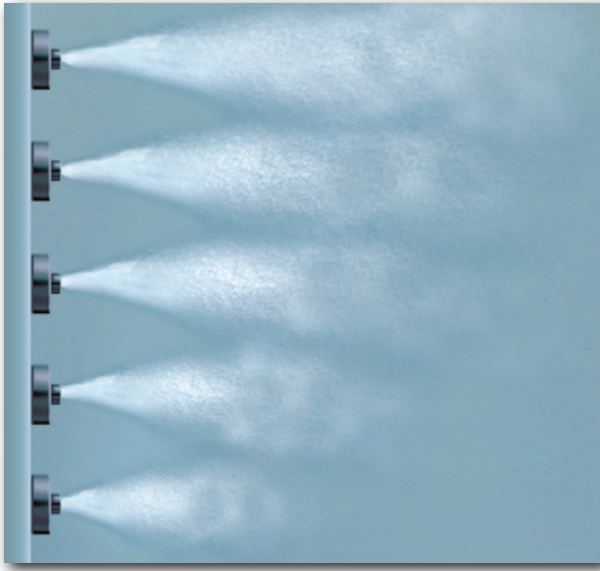

Ease Your Pain

Imagine having your very own personal masseuse to direct which muscles to massage. The QCA Spas Massage Sequencer allows you to control jet patterns, placement and speed so you can pinpoint the areas of your body to massage.

QCA Spas Lets You Choose Your Level of Hydrotherapy

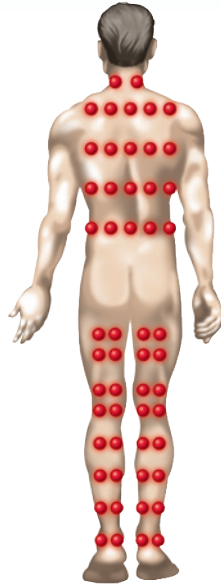

- 1) **Maximum Turbo Charging:** Jets provide a vigorous massage to loosen those tight, knotted muscles and increase blood and oxygen circulation to sore muscles and joints.
- 2) **Medium Turbo Charging:** Decreases the amount of forced air injected into the water for a mid-range level of massage.
- 3) **Low Turbo Charging:** Provides a low level of forced air and water mixture to soothe tired, aching muscles back to health.
- 4) **Hydro-Boost Level:** Injects a mild level of air into the water for an invigorating massage.
- 5) **Hydro-Massage Level:** Provides a pure, warm stream of water to soothe muscles and increase blood flow and oxygen circulation to the body.

Patented Hydrotherapy

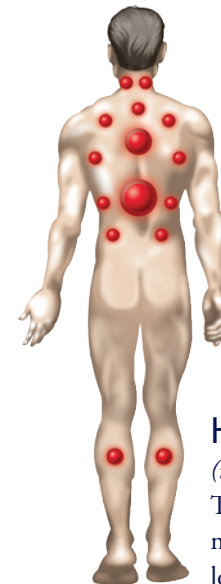

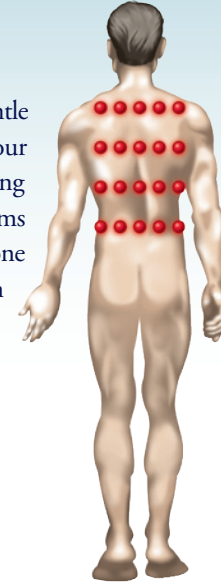

Ultra-Wave Lounge *(full-body)*

Shoulders, full back, thighs, calves and feet. Ultra-Wave Lounger's 54 jets provide a pulsating wave massage one to two rows at a time from your neck to your toes. Seven function programmable controls provide seven massage patterns at three variable speeds over your body. These invigorating streams may be paused at any level to continuously massage one part of your body.

Wave Max™ Seat *(full-back)*

The Wave Max™ seat has 20 jets that stair-step five gentle streams of water, one row at a time, up and down your back – giving the sensation of gentle fingers massaging those aching, tired muscles. These invigorating streams may be paused at any level to continuously massage one part of your back or programmed to perform seven different massage patterns at three variable speeds.

Hydro Max™ Seat

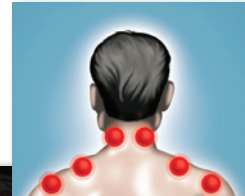

(neck, shoulders, back & calves)

The Hydro Max™ seat provides a targeted massage for your neck, shoulders, upper and lower back, and calves.

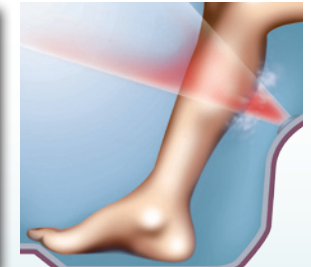

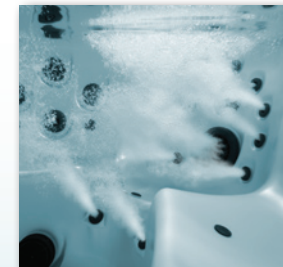

Foot Massager

Strategically placed 14 nozzle jets allows a constant flow to all 14 nozzles providing an invigorating massage to a wide area of the foot.

Neck & Shoulder Massage

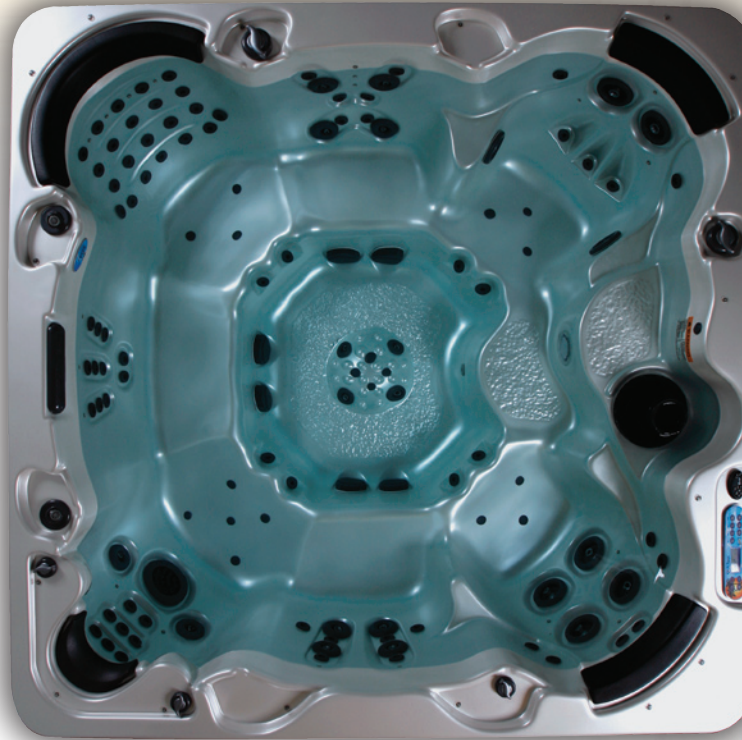

The contoured wrap around neck rest contains two directional euro-jets that allow warm jetted water to be directed to various locations of the neck and shoulders to soothe neck and shoulder tension.

Get Into Your Zone

In a QCA Spa, every seat has been ergonomically designed to fit the contours of your body.

Zoning allows you to direct all the water flow power from one of the 5HP pumps to one selected Hydrotherapy Seat or up to three seats at one time. The zoning feature provides you with concentrated hydrotherapy and a powerful massage. It also lets you spread out the power to soften the water therapy.

Every Seat Provides Unique Hydrotherapy

Come home to a different and unique body massage every night of the week. The Paradise Supreme offers 8 different hydrotherapy seats.

Engineered for Performance & Maximum Water Flow

Manifold Plumbing

Our Manifold plumbing is designed to balance water pressure distribution and reduce the number of plumbing joints to maximize water flow.

Jet Action

Designed and built exclusively for QCA Spas, our jets are positioned for optimum performance. Settings range from power surge, which creates a lively swirling action to direct-pressure flow, which delivers a narrower stream for more intense therapy on a specific area of your body.

Turbo Max™

Get the most out of your spa session with the Turbo Max™ air injection system. The water is supercharged with air using a three-speed air blower, making your spa erupt and giving you an invigorating massage. Unlike other air blowers on the market, our system is silent and fully adjustable. Choose from ten levels of intensity with the touch of a button.

Jets

Choose from two designer jet styles:

Two-Tone
Graphite

Stainless
Steel
Graphite

Pressure Treated Framing

Manifold Plumbing
Design

2" Posi-Flow Jet
Provides a constant narrow stream for a more intense therapy on specific muscles.

2" Directional Posi-Flow Jet
Allows the user to adjust the narrow stream of water to position it on specific muscles or areas of the body.

Plus 31™ Air Massage Jet
These tiny holes of forced air provide a soft overall body massage from the seat of the spa.

2" Directional Hurricane Jet
A large 1" stream of water that is adjustable up to a 40 degree angle for an invigorating massage over a wide area of the body.

3" Directional Hurricane Jet
A large 1" stream of water that is adjustable up to a 40 degree angle for an invigorating massage over a wide area of the body.

3" Vari Swirl Hurricane Jet
A single 3/4" nozzle jet rotating on ball bearings, from the pressure of the water that's adjustable up to a 26 degree angle and provides a 360 degree massage coverage area to the body.

4" Directional Hurricane Jet
A large 1" stream of water that is adjustable up to a 40 degree angle for an invigorating massage over a wide area of the body.

4" Vari Swirl Hurricane Jet
A single 3/4" nozzle jet rotating on ball bearings, from the pressure of the water that's adjustable up to a 26 degree angle and provides a 360 degree massage coverage area to the body.

5" Massage Hurricane Jet
A small 1/4" nozzle jet that provides a constant power flow to all 14 nozzles providing an invigorating massage over a wide area of the body.

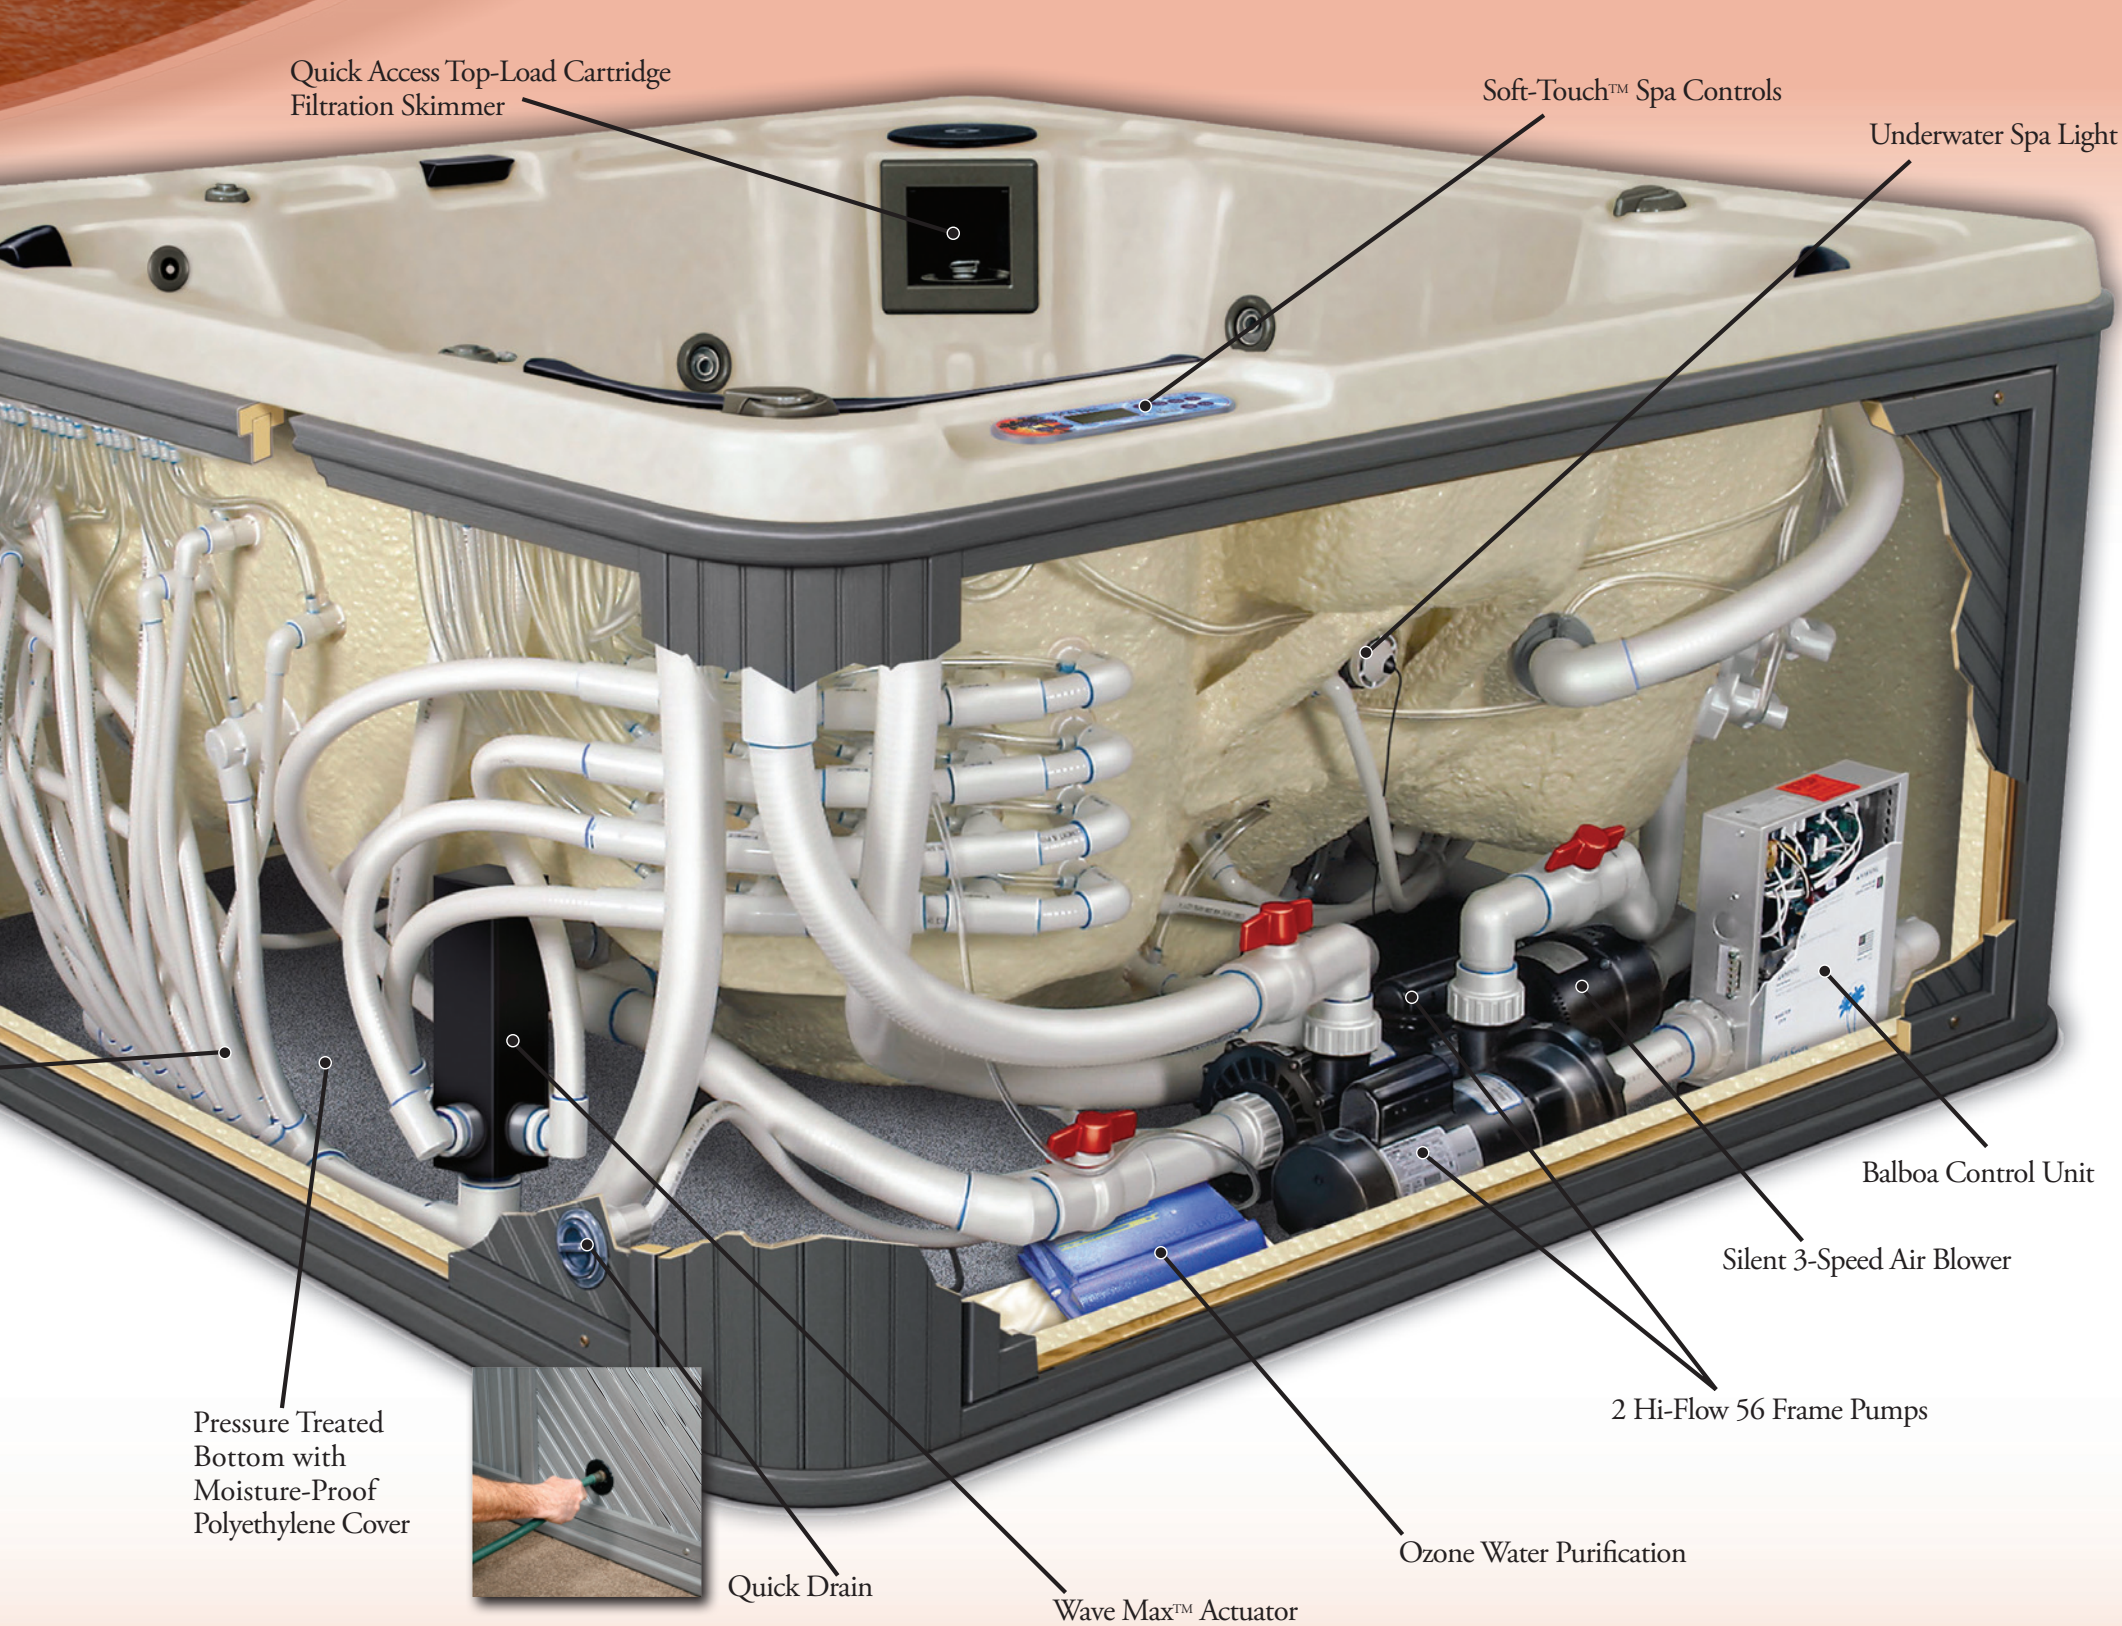

5" Vari Swirl Hurricane Jet
A single 3/4" nozzle jet rotating on ball bearings, from the pressure of the water that's adjustable up to a 26 degree angle and provides a 360 degree massage coverage area to the body.

7" Massage Hurricane Jet
A large 1/4" nozzle jet that provides a constant power flow to all 14 nozzles providing an invigorating massage over a wide area of the body.

Engineered for Strength, Beauty & Easy Maintenance

Durability

Most spas look great in the showroom, but it is important to ask yourself how the spa will look in a few months – or a few years. For this reason, in addition to the spa's inner workings, you will want to consider the material used for the shell.

Dura-Bond™

QCA Spa shells are manufactured with a patented four-layer strengthening process called Dura-Bond™. This exclusive system combines the beauty of Lucite-Xtra™ Acrylic with a layer of ABS for shell strength and integrity. QCA Spas then applies a layer of double strengthening material called Dura-Bond™. This high-density material is reinforced with a fibrous chop material that adds overall strength to the spa shell. The process is completed with a thick insulating layer of polyurethane foam.

Lucite-Xtra™ Acrylic Sheet

Lucite-Xtra™ cast acrylic is a non-porous material that resists stains like build-up of lotions and body oils, which can ruin non-acrylic spas. This tough material keeps its shine and color despite sanitizing chemicals, high temperatures, and exposure to sunlight. Its durable surface resists chipping, cracking and denting.

Lucite-Xtra™ is easily maintained with a sponge and mild soap. No additional polishing or waxing is needed to keep its lustrous appearance.

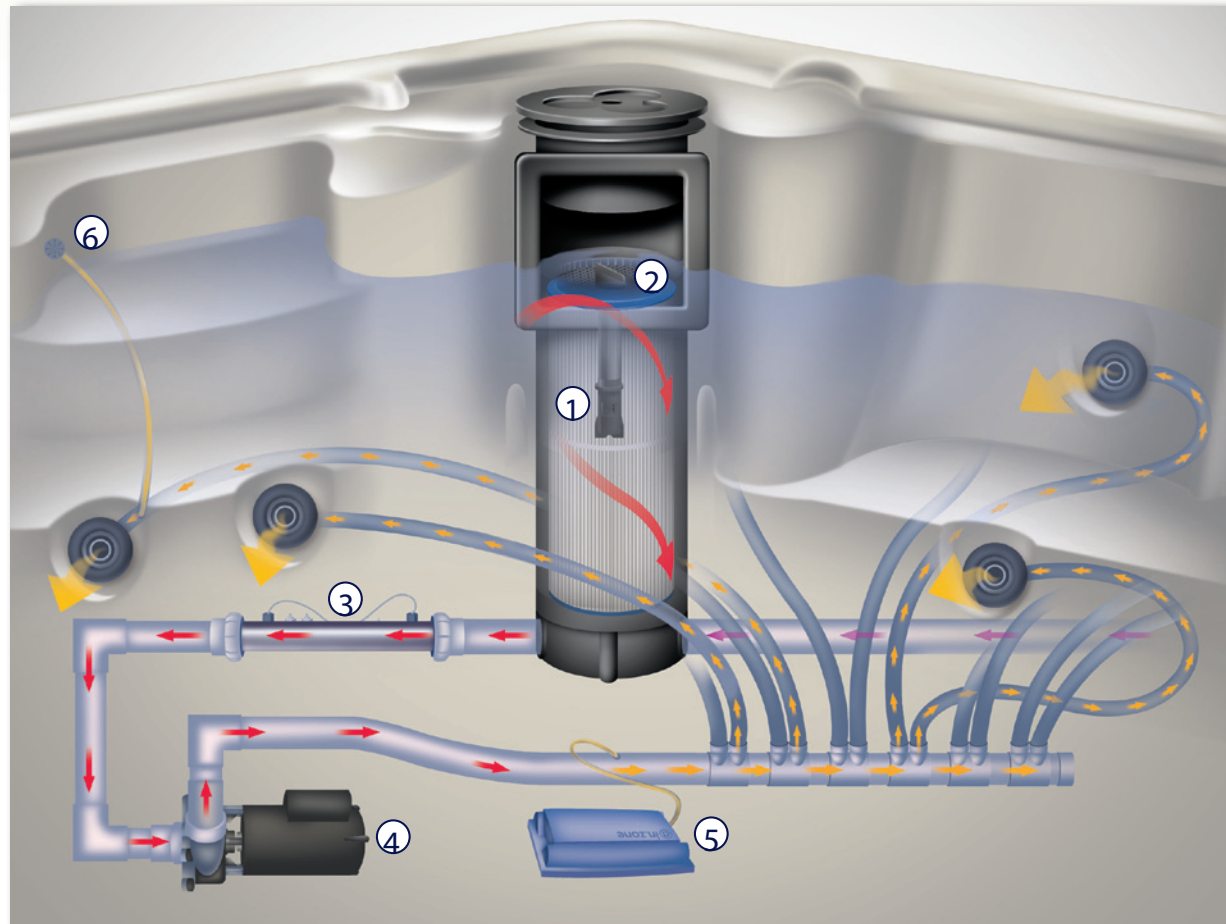

QCA Spas' Hydro-Pure System Keeps Spa Water Crystal Clear

Spa sanitation can be frustrating and time consuming. QCA Spas' exclusive Hydro-Pure System makes spa sanitation simple, so you can spend more time enjoying your spa and less time maintaining it.

1) 100 sq. ft. filters that are capable of filtering a 15,000 gallon swimming pool can easily filter out dirt and organic waste from a 500 gallon spa.

2) The built-in chemical dispenser automatically dispenses the correct amount of sanitizer into your spa water.

3) The spa's inline heater with smart sensor technology regulates water flow and water temperature for effective sanitation and spa safety.

4) The spa's Hi-Flow pumps are capable of cycling 500 gallons of spa water through the sanitation system in as little as two minutes.

5) The spa's corona discharge ozone unit is activated during the filtration cycles and heating cycles. Ozone sanitizer is injected directly into the spa's waterline and then distributed into the spa's main body of water.

6) The ozone recovery system captures unused ozone that rises out from the top of the spa's water, then redistributes it back through the waterlines and into the spa's main body of water. This process keeps ozone from destroying your hard cover.

Top Load Filter & Built-In Chemical Feeder

For ease of maintenance, all QCA Spas have top load filtering systems. Top load filtering systems are easy to remove for cleaning and the automatic chemical feeder cartridge is easy to fill with your favorite sanitizer.

Forever Beauty, Maintenance Free & Energy Efficient

The QCA Spas' DURA-FRAME Cabinet provides strong support and a thermal-insulation barrier from sub-freezing temperatures

- Constructed of Powder Coated, Galvanized Steel
- Reversible Panels made from the finest Synthetic Material
- Natural Wood Grain Appearance
- Won't split, crack, peel or splinter
- Insect proof
- Moisture proof
- Lifetime rot resistant
- Fade resistant
- Maintenance free
- 10-Year Warranty

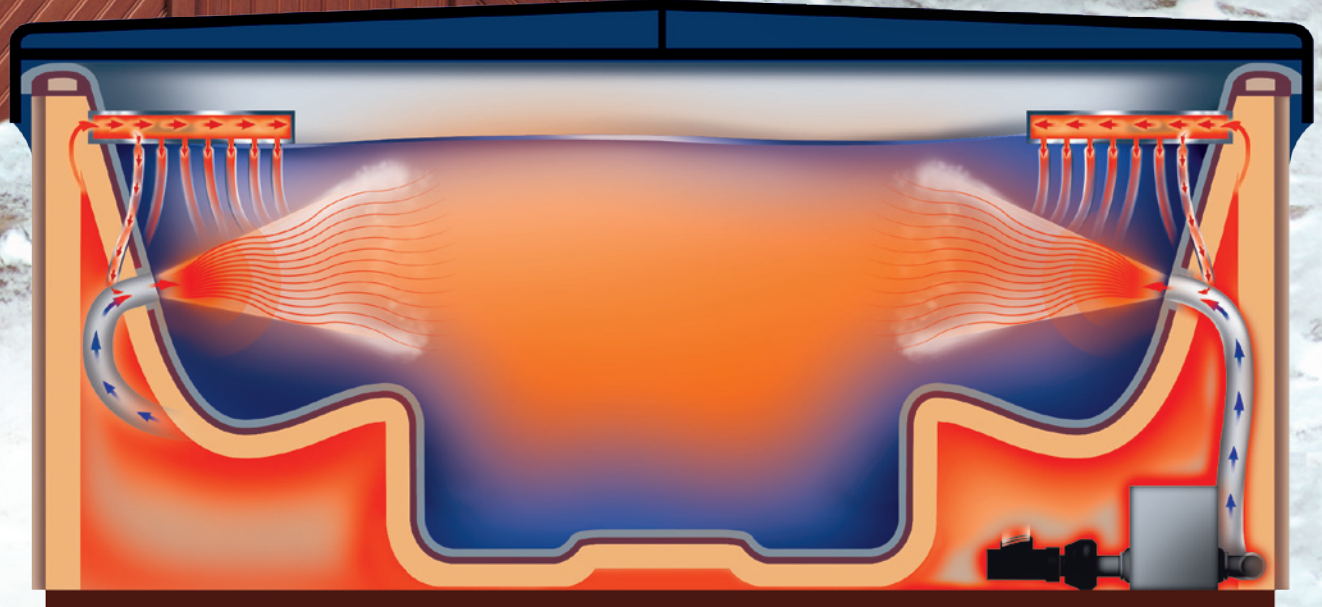

Polar Insulation

QCA Spas are made to withstand cold, midwestern winters. Our system incorporates a fully foamed cabinet to eliminate air infiltration, along with a thick layer of polyurethane foam applied to the shell. The ambient air between these two layers of foam in the cabinet provides a high insulative barrier to maintain spa water temperature.

Energy Saver System

Heat produced by the spas mechanical equipment is not vented away in a QCA Spa, it is trapped and reused. As water moves through the lines toward the jet it draws air in with it, which is known as venturi. This air is taken from the pocket created by the Thermal Barrier insulation system. Warm air is recycled through the spas water lines and dispersed back into your spa to maintain the water temperature – saving you energy and money!

Indulge Yourself with the Highest Level of Luxury

Relax in your spa while watching your favorite television show, sporting event or movie in surround sound on QCA Spas' cable/satellite ready 15" LCD TV with built-in DVD player. You'll feel the sound emanate from the shell of the spa with the VibraSound™ System. When your spa session is over, disconnect the TV with two easy steps and take it in the house or your vehicle to continue watching.

Take your spa experience to the next level with VibraSound™. QCA Spas incorporates a 200-watt stereo

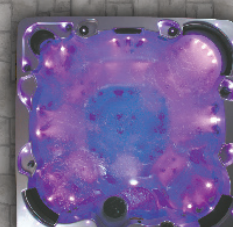

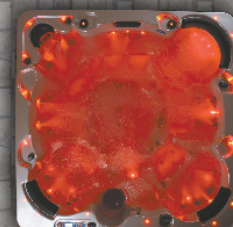

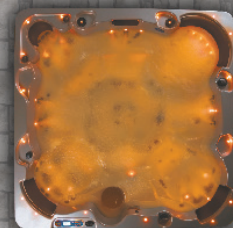

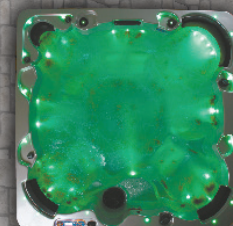

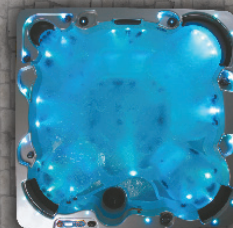

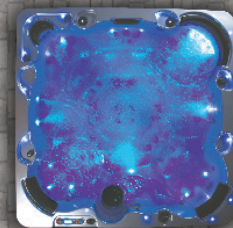

receiver/CD player with sub-woofer and VibraSound™ speakers built into the spa shell to transmit the sound through the shell and into the water. Not only does this produce superior sound, it allows you to feel the music through the water, adding another dimension to your massage. This unique system also provides two external patio speakers for the listening enjoyment of those outside the spa, creating a total outdoor entertainment center.

- 200 watt AM/FM CD stereo
- Built in equalizer
- Four VibraSound™ speakers
- Sub-woofer
- Two patio speakers

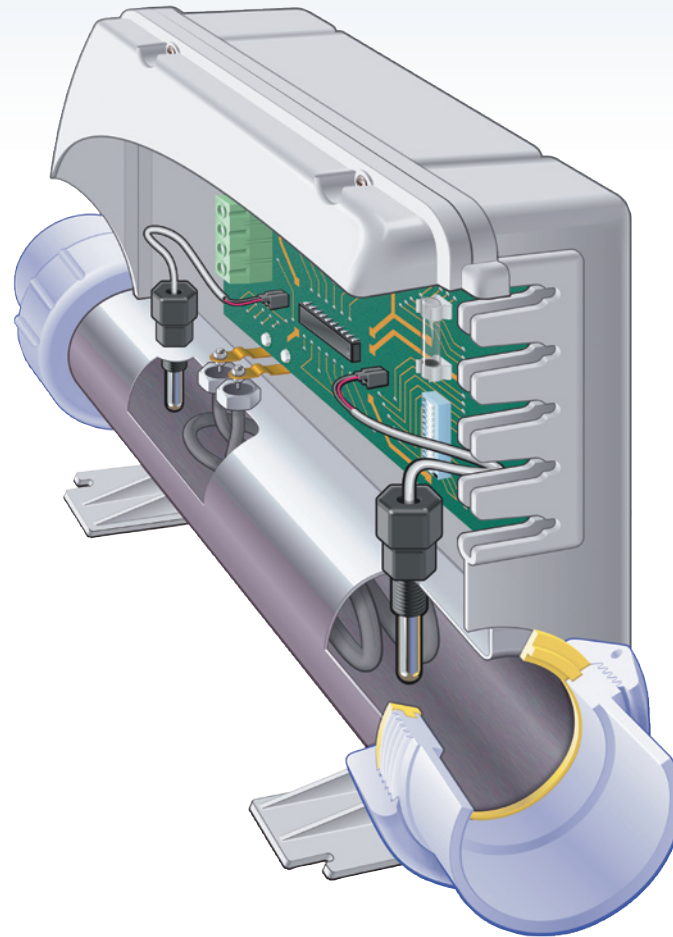

Light Therapy to Set the Mood

Our optional LED lighting package features brighter and more reliable lights than fiber optics. LED lighting is now used in vehicle taillights and traffic signals and will last up to ten years. In your spa, it provides a beautiful cascade of color illuminating the waterfall, top rail and underwater spa seats. You'll choose from a wide range of colors using state-of-the-art topside controls.

State-of-the-Art Spa Technology

QCA Spa control systems are the most advanced controls in the industry. By utilizing Balboa's patented software and design with state of the art materials, Balboa's M-7 technology provides you with a more reliable heating and control system. QCA Spas uses five different Balboa control systems to accommodate QCA Spas' five unique spa lines.

Smart Sensor Technology

- Sensors monitor each other via software to regulate spa functions (water flow, temperature)
- Assures a proper operating environment for the heating element
- Multiple high-limit safety systems
- All safety functions are always active
- Eliminates excessive cycling
- Detects flow restrictions such as a dirty filter
- Minimizes calcium buildup on the element

Soft Touch™ Controls

Our state-of-the-art Soft Touch™ spa side control puts you in charge. All functions are conveniently located at your fingertips.

Quality Assurance Warranties

Paradise™, Majestic™, Jewel™ & Performance™ Limited Warranty

Rest Assured

Each and every QCA Spa goes through a 50 point inspection and fully filled testing process with 104 degree water to assure you that your spa will perform flawlessly when it's delivered and for years to come.

Ten-Year Shell

The shell is warranted against water leakage caused by a defect in material for ten years from the original date of purchase.

Five-Year Surface

QCA Spas warrants the Lucite-Xtra™ surface against blistering, cracking, or delaminating for five years from the original date of purchase.

Five-Year Plumbing

Spa plumbing, fittings, pipe, drains and fixtures are warranted against leaking due to defects in materials for five years from the original date of purchase.

Three-Year Equipment

QCA Spas warrants the spa equipment (heater and spa electrical equipment) against defects in the material for three years from the original date of purchase.

Two-Year Pump

QCA Spas warrants the spa pump and pump motor for two years from the original date of purchase.
