

Start enjoying life.

Since 1979

Stress has met its match

The Sunbelt Spa experience is a treat for all the senses ... the sights of sensuous swirling waters, aglow with underwater lights; the sounds of effervescence in the rush of a billion bubbles breaking the rolling surface; the smells of lush aromatic oils that beckon romance and calm the soul; even the tastes of cool, refreshing drinks are enhanced by the warmth of well-being that washes over you ... but the greatest sensory sensation of a spa is touch — the incomparable feeling of pulsating water massaging every inch of your body like the strong, gentle hands of a master masseuse. Probing, kneading, stimulating, caressing ... the warm, wet, lingering kiss of contentment.

Take the whole-body approach to happy health — reduce stress, soothe aching joints and tired muscles, improve circulation, lower blood pressure, sleep more soundly, and brighten your life with daily doses of pure enjoyment in a Sunbelt Spa.

How we build them:

Sunbelt has been building spas since 1979. In those twenty seven years, we've learned a thing or two about giving our customers what they want. Which is why we offer over 45 different designs, each with unique seating arrangements and jet combinations.

Sunbelt Spa Dealers are everywhere...

India, United Kingdom, Ireland, Malta, Cyrus, Greece, Romania, Bulgaria, Hungary, Italy, France, Spain, Portugal, Germany, Czech Republic, Slovakia, Sweden, Norway, Finland, Japan, Korea, Australia, South America and throughout the United States.

Each of our spas is crafted to the highest standards of workmanship. We use only the finest materials and components available. For our customers, nothing else will do.

When we design a spa, whether it's an intimate spa for 2 or a spacious 8-seater, we concentrate on one thing: giving you the very finest spa experience possible, in as many different ways as possible.

Every seating arrangement is carefully thought out so each individual has their own uncrowded space from head to toe. Jet types and placement are carefully considered to give each seat its own unique "feel" and range of massage sensations. We expect people to move around in our spas, sampling each seat and savoring the different flavors of massage from neck and shoulders, to back and thighs, calves, ankles and feet. From deep penetrating back massage and the foot-pleasing turbulence of a volcanic geyser jet to the airy flutter of a neck-and-shoulders waterfall, Sunbelt Spas are dedicated to your total body pleasure.

Sunbelt Spas are designed to be low-maintenance as well as high-pleasure. From the versatile Balboa Control Systems that automate everything from temperature settings to filter cycles, to the ozone generator and front-access filter system that keeps your spa water clean and clear, Sunbelt Spas are the epitome of carefree operation and minimal upkeep. Once you've owned a Sunbelt Spa, you'll never want anything else.

The Wave Seat

A building block to a great spa:

The wave seat beckons:

Sunbelt's Wave Seat is every back sufferer's fondest dream. A wide pattern of cluster jets are arranged in rows from shoulder to hip. Each row of pulsating jets fires on and off, rippling up and down your back to relax the muscles, soothe away stress, and drain away pain. You'll feel so good that drifting off to sleep is a real temptation. Luckily, each Wave Seat includes an extra-wide neck pillow, upon which to rest your happy head.

Sunbelt Wave Seats come in 24, 26 and 32-jet configurations, 4 rows of six jets and 4 rows of 8 jets, respectively.

- Jupiter and Jupiter Jr. 6-person models: 24-jet Wave Seat
- Aurora 7-person model: 26-jet Wave Seat
- Andromeda and Ultra 8-person models: 32-jet Wave Seat
- Spectra 7-person models: 32-jet Wave Seat
2 double size Wave Seats & double wave lounge

Set the mood:

Nothing relaxes like a spa, and nothing sets the mood like music. Music and spas go together like champagne and bubbles.

Select from the following quality sound components as expansion options for your spa:

Sony® CD/AM/FM Stereo (XM ready) — the unmatched quality of Sony sound. Move your CD collection out by the spa; you'll be surprised how much being warm and wet adds to your musical enjoyment! It's XM Satellite Radio ready, too. Just plug in the cable and go.

Sony® 6-Disc CD Changer — Load up 6 hours of your favorite tunes, put the massage jets on high, lean back and smile. You'll come out looking like a prune, but what a gas! (It's perfect for party time, too. And do get out of the spa once in a while. Gee.)

Transducer Speakers / with Subwoofer — Forget conventional speakers; this is sound you can feel. This remarkable audio technology uses factory-installed transducer panels to turn the very walls of your spa into stereo speakers! The sound literally surrounds you. Equally amazing is the localization; you may be reclined in your spa listening to music, but people outside the spa just a few feet away will hear only a pleasant background.

Also available, factory-installed pop-up speakers. They deliver rich, concert hall stereo, and they can pump out enough distortion-free volume to turn your whole backyard into a party zone.

(Available on select models only. See your dealer for details.)

Rest your weary head:

Forget resting your head on a folded towel that gets all cold and soggy... Sunbelt Spas have soft, cushioned headrest pillows that are contoured to cradle your neck in comfort. The non-slip material lets you stretch out and relax without drifting away from the side.

Enrich All The Senses

LED Color Lighting

While you're setting a mood, don't forget lighting. Sunbelt has several custom lighting packages, including 20-spot surround light and 32-spot water infusion lighting system. They add nighttime beauty and safety to your spa.

Aromatherapy

Music, lights, and... fragrance! Make your spa a true treat for all the senses with a Sunbelt Aromatherapy system. Just add a few scent beads to the convenient topside fragrance well, and let the aroma of your choice waft across the water. Scent beads are available in dozens of aromas.

Spa Maintenance Made Easy

Keeping your Sunbelt Spa clean and the water pure and sparkling is easy and inexpensive. We've taken the work out of it with options and standard features that automate most of the process.

Ozone Injector System — Use far fewer chemicals and get cleaner water. UV light-generated ozone — an especially active form of oxygen — infused into the spa's water is virtually 100% effective in eliminating harmful organisms from your spa. Ozone is literally thousands of times more effective than chlorine in eradicating these health hazards.

Ozone Bonus #1: You'll use far less chemicals and save considerable money and time cleaning your spa.

Ozone Bonus #2: Unlike chemicals such as chlorine, ozone introduces almost no odor or coloration into the water; ozonated water smells naturally sweet and it's crystal clear.

Ozone Bonus #3: Unlike chemicals, ozone is very gentle to hair, skin and bathing suits.

Ozone Bonus #4: While ozone-treated water is deadly to little bitty organisms like germs and bacteria, it's completely harmless to great big organisms like you and me!

Front-Access Skim Filter (Standard on all Sunbelt Spas) — During normal spa use, or whenever your spa is uncovered, little bits of junk get into the water. Your spa's skim filter automatically removes them and keeps your water clean and clear. The only maintenance required is periodic inspection and replacement of the filter cartridge. The filter's front-access design makes this a quick and easy operation; all you need is a calendar.

Balboa On Board

Every Sunbelt Spa comes with a command center that puts the perfect spa experience at your fingertips.

EL2000 SERIES

The most advanced spa control with both time and day programming.

You can have the perfect spa waiting for you on the day and at the time you want. The backlit Balboa EL2000 is packed with features:

Primary Controls: • Temperature • Pump Speed • Air Injection • Lights and Filter Cycle • Freeze Protection

Messaging: • 18 Diagnostic Messages • 8 Maintenance Reminders

Modes: • Automatic • Standard • Economy • Sleep • Standby • Standard in Economy • Sleep • Standby Filter Cycle

Standard Equipment on the: Storm, Supreme, Ultimate and Wave Series

With Balboa Controls, you're in control:

VS 501 Series

This high quality backlit control pack provides excellent spa control with all the features you would expect from a Sunbelt Spa.

Primary Controls: • Temperature • Massage Jets • Air Injection

Messaging: • 12 Diagnostic Messages • 3 Maintenance Reminders

Modes: • Automatic • Standard • Economy • Sleep • Standby • Lights and Filter Cycle (2,4,6, or 8 hours)

Standard Equipment on the: Alpha and Premium Series

Light Leader

Featured in the Prestige Patio Series. This control pack only requires a standard 110V plug... no special wiring required! This full feature control pack includes:

Primary Controls: • Temperature • Massage Jets • Lights and Filter Cycle • Freeze Protection

Messaging: • Diagnostic and Maintenance Reminders

Auxiliary Control

This second controller is available on Supreme, Ultimate, Wave Series, and Storm Series Spas.

Primary Controls: • Massage Jets 1 & 2 • Lights and Air Injection system

Massage jets... your new best friends.

In addition to the many types of seat and wall jets shown below, many Sunbelt models also have foot well Geyser Jets available as an option.

STRESS RELIEF ADJUSTABLE CLUSTER STORM JET

Usually placed in patterns, the Cluster Jet delivers a very strong, pinpoint massage.

MINI STORM ROTO JET

Small but mighty, these fast-spinning jets release a swift and powerful vortex of water that invigorates your body and increases circulation.

POLY STORM ROTO JET

Position the adjustable, rotating nozzle inward for a strong, spot massage. Angle the nozzle outward for a great rotating massage over a wider area.

POLY STORM II PULSATOR JET

Two rotating water ports deliver a wonderful pulsating massage. Turning the jet produces the desired effect.

POWER STORM ROTO JET

A large faced jet that delivers a spin or pinpoint massage for the upper and lower back. For Storm Series only.

POWER STORM MASSAGE JET

This multi-port jet provides a deep, kneading massage as each port fires off and on in an "around the clock" pattern. For Storm Series only.

JUMBO STORM ROTO JET

Ultimate lower back massage is achieved by adjusting water volume low, high or in between. Change from clockwise to counterclockwise rotating action with a click of the nozzle. This is a very powerful adjustable jet.

AQUA FAN MASSAGE JET

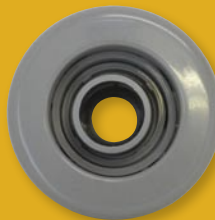

A light lumbar back massage with lots of air.

SWIM SPA POWER JET

Found in Sunbelt's Swim Spas, these powerful jets provide the water currents that allow you to "swim in place."

MULTI-PORT AIR INJECTOR

These are the bubble machines that fill your spa with billions of little air balls that bubble and burst, adding a visible, audible, and physical sensation that's a treat for your whole body!

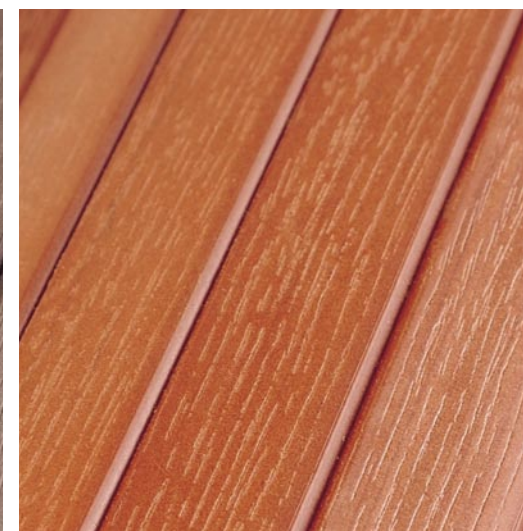

Spa Skirting

Enclose your spa with CPI EON® non-maintenance synthetic cabinet. The very best cabinet available on the market.

Sunbelt features CPI EON®, a revolutionary wood replacement product, in all our spa enclosures. EON® combines the natural beauty of wood with maintenance free, lifetime enjoyment. EON® is impervious to water, sun and spa chemical degradation, it will not fade, splinter or crack, and because no finishing is required it will always remain maintenance-free. CPI EON® Textured Panels are available in Charcoal Gray and Redwood.

There's also a practical side to beauty. Those beautiful side panels are designed for easy removal and reattachment, allowing easy, unfettered access to the interior through all four sides of the spa.

Spa Steps — Make entries and exits graceful and safe. A highly recommended courtesy for older guests and children.

Spa Covers

As we mentioned earlier, an insulated spa cover is an important part of spa care. It helps keep the water clean and clear, and trims heater cycles.

Sunbelt Spa Cover Features: High-density EPS Foam, strengthened with channeled reinforcements, is tapered from 4" to 2" for rapid water drainage, then covered with 3 mil, heavy duty plastic. The outside covering is a fire retardant, marine grade vinyl with 100% polyester backing, and is available in a variety of colors to match your Sunbelt Spa. A vapor lock at hinged sections and tight-fitting perimeter skirting prevent heat loss. Covers are chlorine, mildew and -20° cold crack resistant. Other features include reinforced handles and security locks with keys.

Vibrant Spa Colors

Sunbelt shells are made from world-famous Lucite® acrylic for the authentic look and longevity of classic stone. For their love of marble, granite and fine gemstone, the ancient Greeks and Romans would have viewed these spas as fitting appointments for royalty.

The optional Celestial Granite™, Lustre Pearlescents™, and Lustre™ Series have Lucite's patented Microban® antimicrobial surface finish to impede bacterial stains and odors for the life of the spa.

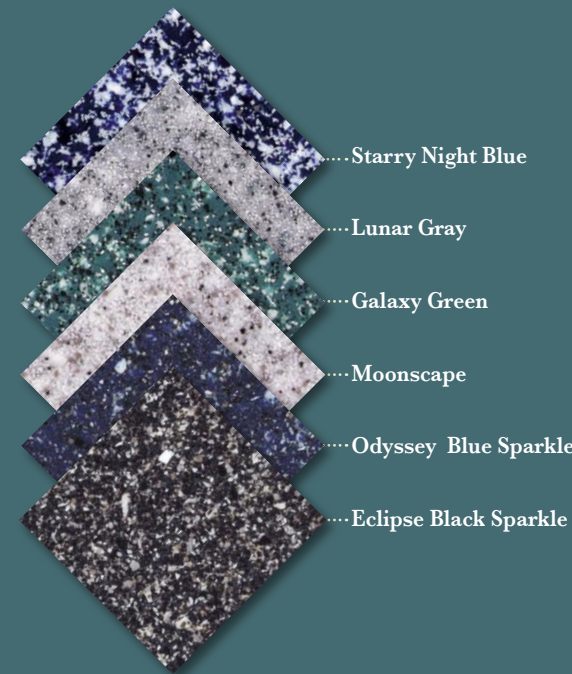

Only hot tubs made from genuine Lucite® acrylic are exclusively available with Microban® antimicrobial product protection, which inhibits growth of bacteria that causes odor, stains and product degradation. Unlike sprays and liquids, Microban® product protection is actually part of the molecular makeup of the Lucite® surface. It virtually never wears off, so it helps your spa stay cleaner between cleanings.

Genuine Lucite® spa surfaces allow you to realize your visions in deep, breathtaking color. Choose from a wide range of finishes to fit any decor — from stunning, textured granite to smooth, elegant marble styles. Lucite® acrylic has color that runs true to the core of the material. With proper care, your hot tub will be as rich and lustrous years from now.

"Sunbelt Spas & Lucite® Acrylic
A Winning
Combination"

Celestial Granite™ Series with Microban®

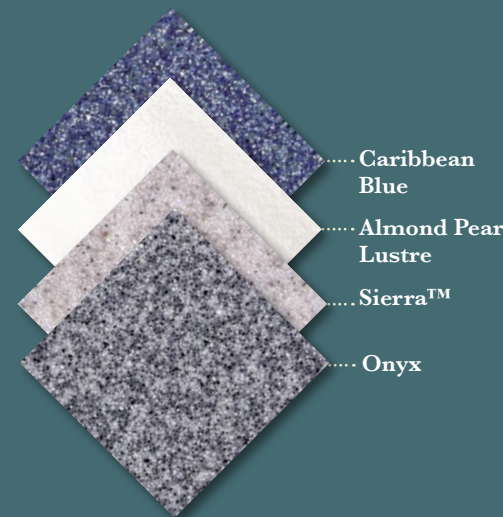

Gemstone® & Marble Series

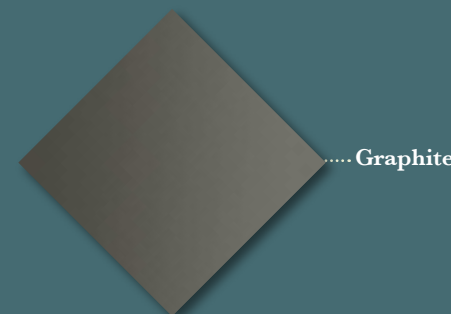

Lustre™ Series: Swirls

Natural Granite Series®

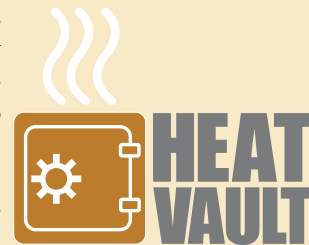

Lustre™ Series®: Pearlescents

It's your heat. Hang on to it.

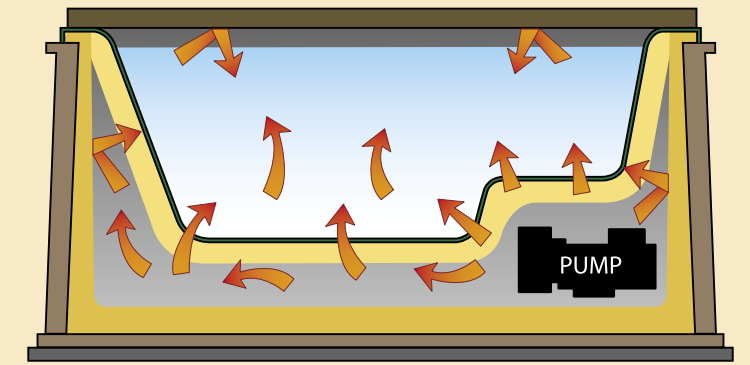

The water in your Sunbelt Spa stays warmer longer with lower energy costs thanks to the ingenious HeatVault™ insulation system built into the enclosure.

Rather than simply filling the interior of the enclosure with foam insulation, as many spas do, the HeatVault™ insulation system uses foam insulation on the bottom of the shell, the floor of the enclosure, and all four interior walls, creating a "dead air" space completely surrounded by insulation. This is the same principle as the double-glazed glass in your patio door, and it works for the very same reason: dead air, surrounded by an insulator, traps heat more efficiently than solid insulation itself.

The spas pumps are housed inside this insulated dead air space, which serves two purposes: it protects the pumps from freeze-up when the outside temperature falls below freezing (the pipes and plumbing are also insulated!), and incidental heat generated by the pump equipment adds to the insulating warmth of the interior air space rather than being lost to the outside.

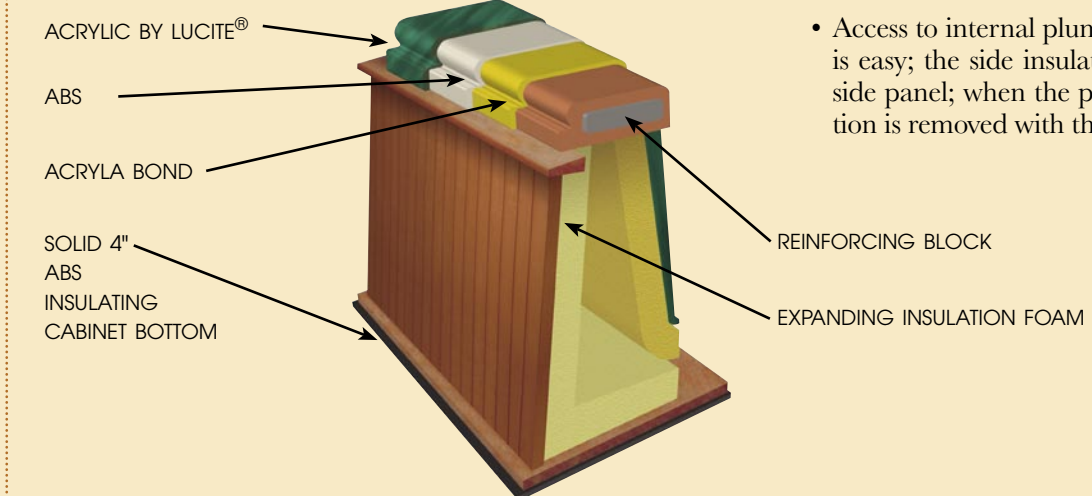

Since the layers of insulation on the interior walls and floor of the enclosure are much thicker than the insulation on the bottom of the shell, the trapped heat of the interior air space rises up through the bottom of the spa shell and contributes to the heat of the water, effectively replacing the heat rising off the surface.

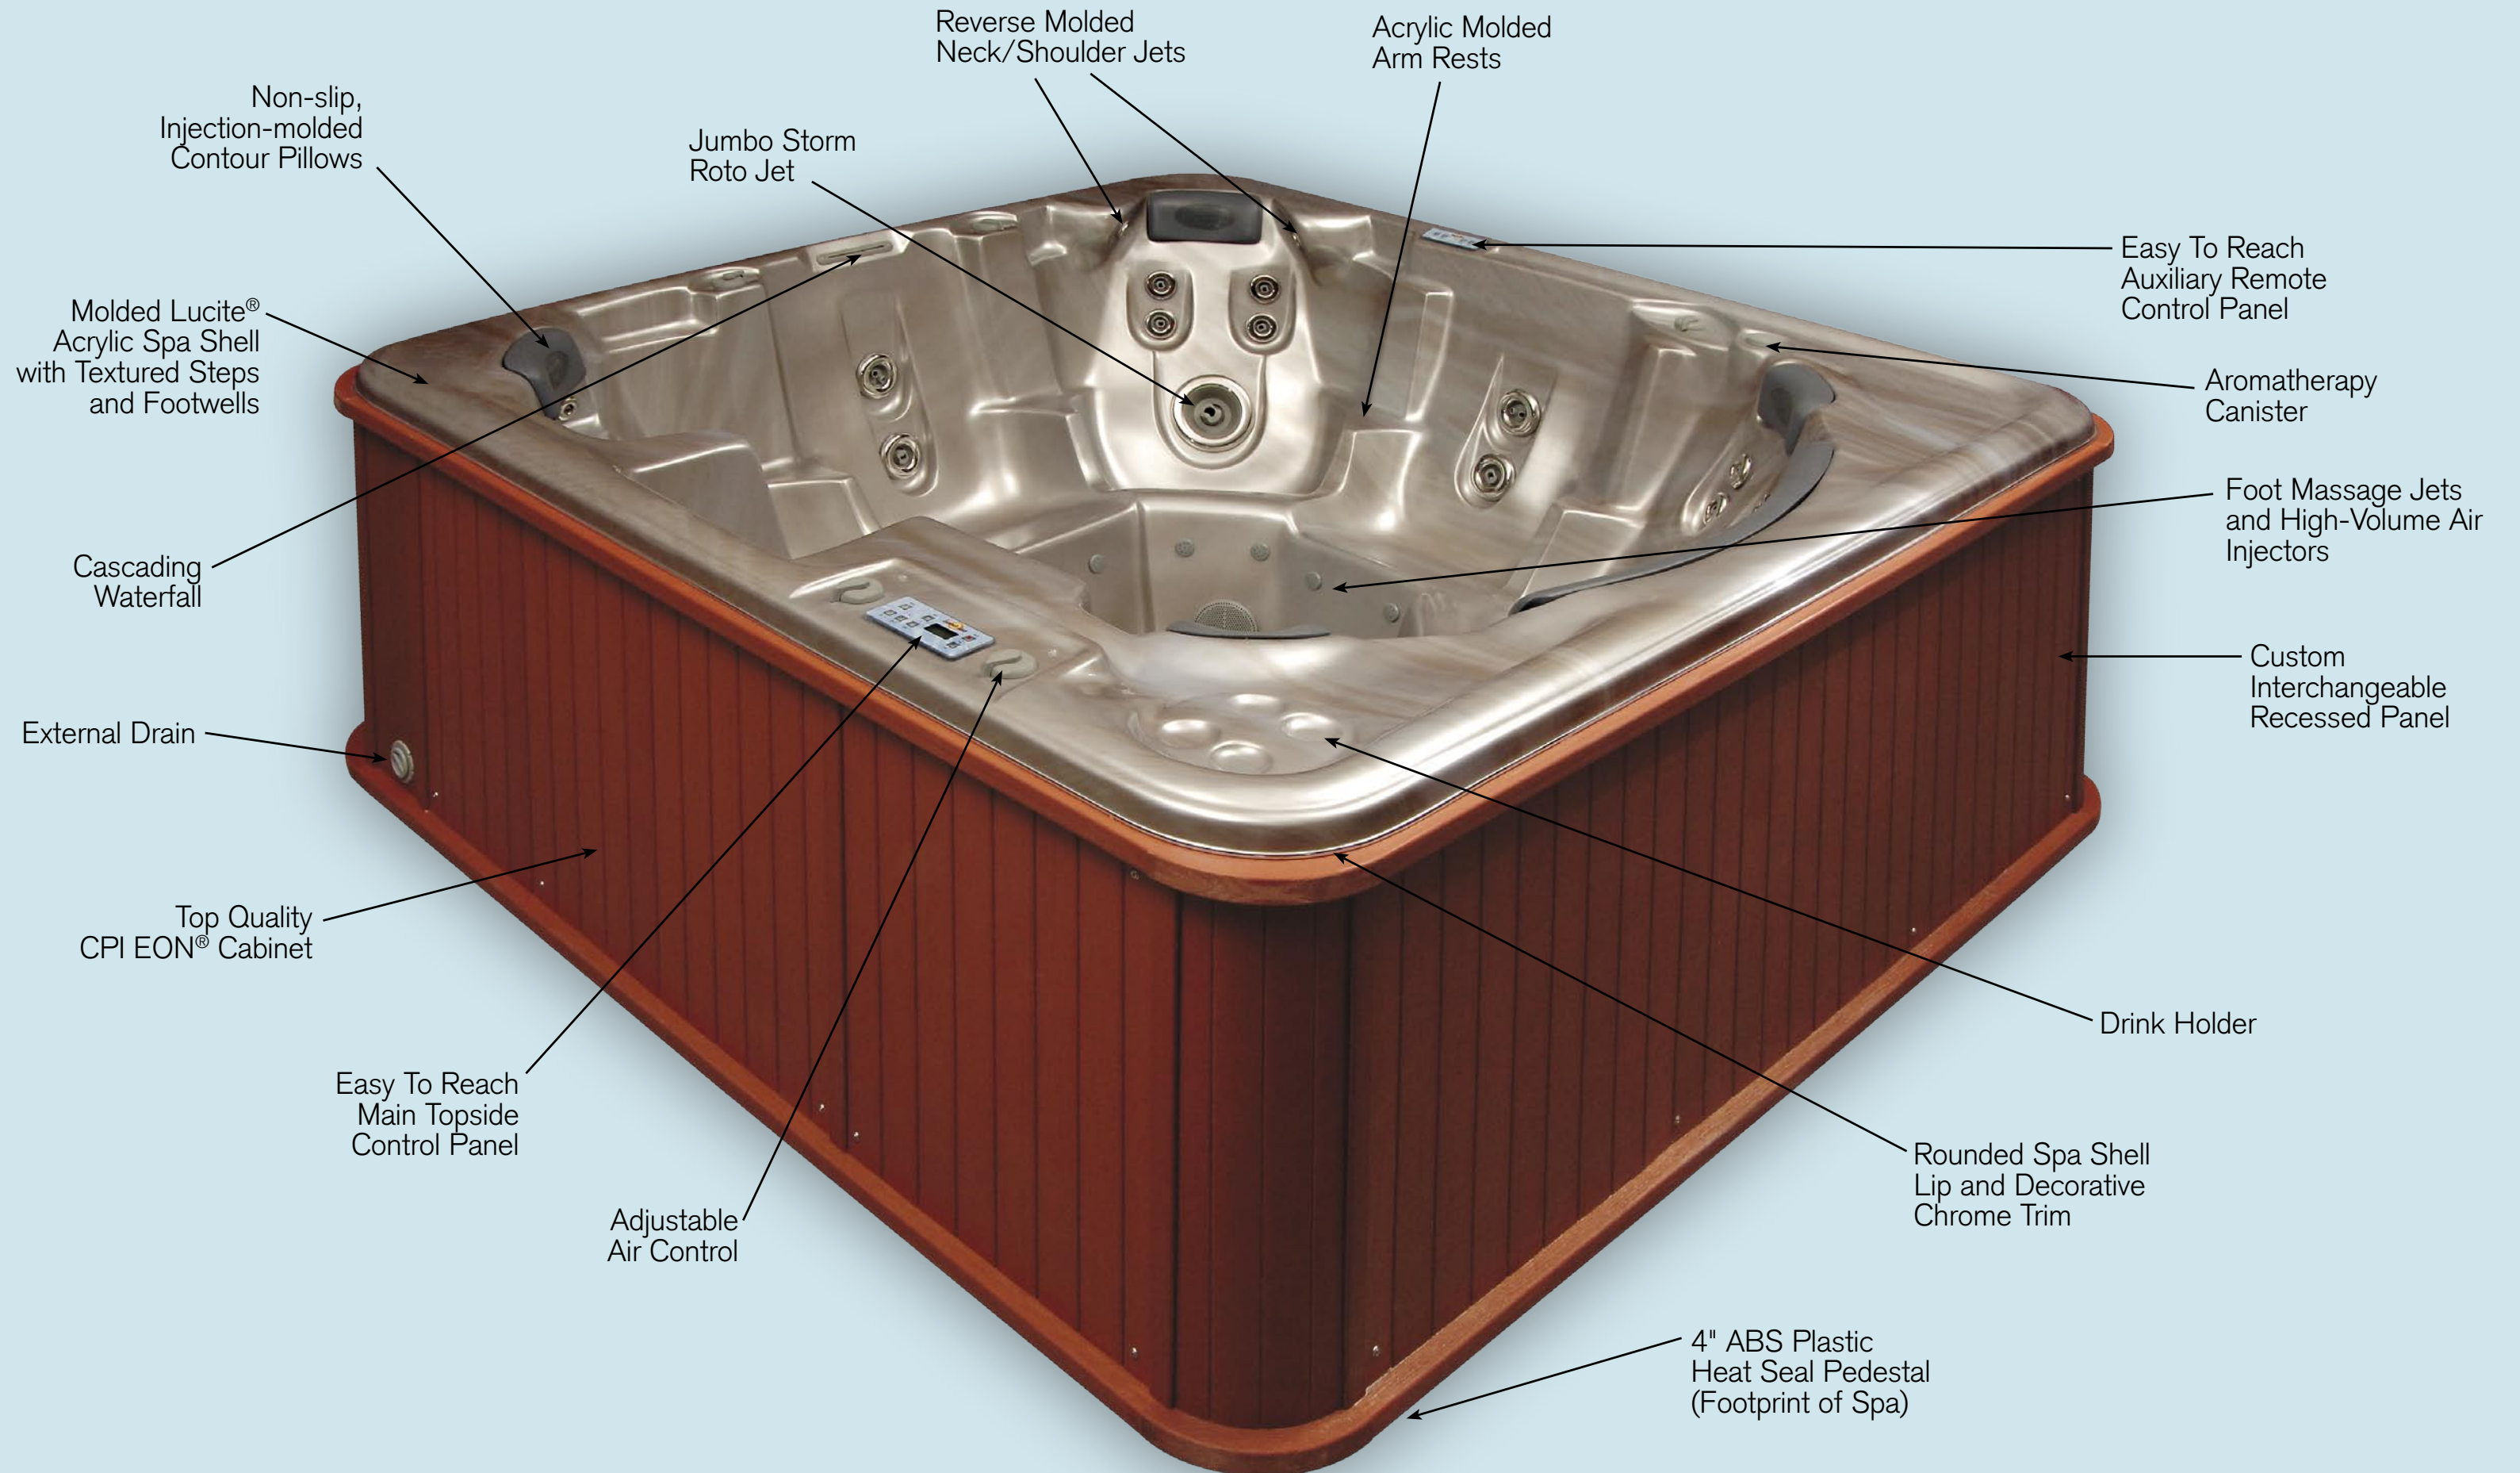

Even under worst-case conditions — including loss of power in sub-zero temperatures — the slow-release heat trap created by the HeatVault insulation system will keep your spa water above freezing for many days.

Advantages of HeatVault™ insulation system:

- Water stays warmer, longer, with lower energy costs
- Incidental heat generated by the spa pumps is effectively recycled back into the spa (this not only lowers your spa's heating costs, but also protects the pumps from overheating by providing a useful method of dissipating the heat they generate)
- Interior pipes and plumbing are fully insulated against freezing
- Access to internal plumbing and the spa's heater/pump systems is easy; the side insulation actually attached to each removable side panel; when the panels are removed for service, the insulation is removed with the panel, allowing for unobstructed access

Every ef□ minor model changes will occur.

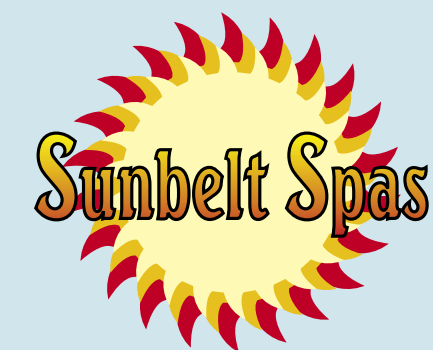

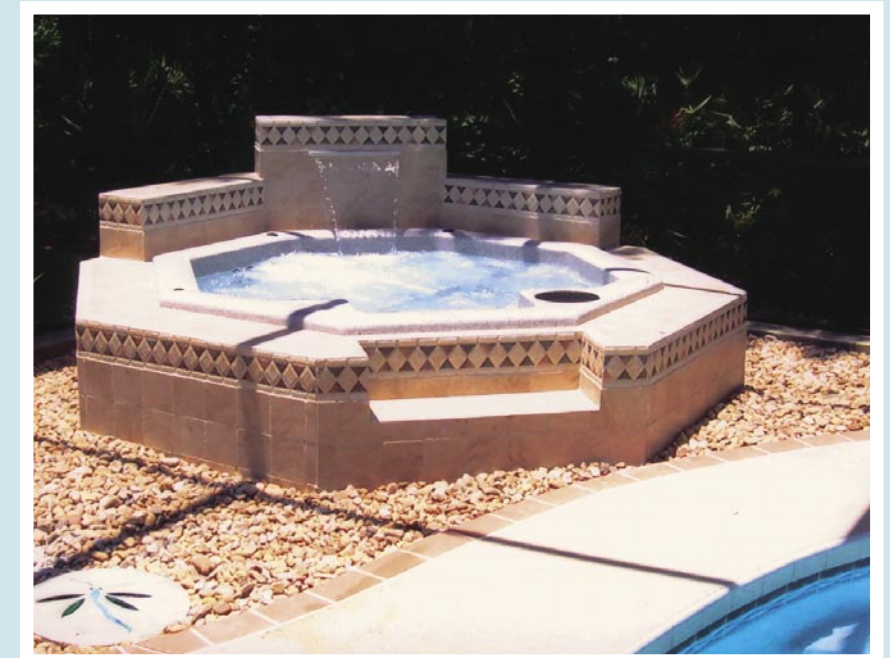

- 1) Control Legend: Light Leader, VS501=VS501 and Top Side Control (TSC), LE=EL2000 Control Pack in single or dual topside configurations.
- 2) Wave Spas all include Wave Diverter Machines.
- 3) The Spectra Spa includes a double size *wave lounge* and 2 *double wide wave seats* and multiple Wave Diverter Machines.

STANDARD FEATURES

- Interchangeable, adjustable recessed jets
- Unique foot massage jets on lounge
- Easy-to-reach topside custom control panel
- Auxiliary custom control panel on opposite side
- Full lumbar support
- 25 vibrant Lucite® acrylic spa colors
- 4 cover color options
- Spa light including red & blue lens
- Molded-in drink holders
- Built-in headrest
- Stress-relief neck jets
- Horizontal, recessed jetting
- Anti-float lounge
- Stainless steel handrails
- Fire resistant insulation foam
- Balboa M-7 Equipment
- Synthetic substructure
- 4" ABS heat sealing "Never Rot" bottom pedestal
- Multi-port air injectors
- Multi-pump system
- Smart winter mode freeze protection
- Automatic shutoff
- Air line clean out
- Sensor and pressure switch failure detection
- External fill/drain valve
- Sunbelt CPI EON® maintenance-free synthetic textured cabinet, available in Charcoal Gray or Redwood.
- Factory installed Ozonator standard on some models.

OPTIONS

- Microban® finishes
- Waterfalls
- 18 color analog lights
- 20 spot premium surround lighting
- 32 spot deluxe water infusion lighting
- Soothing aromatherapy
- Synthetic steps in red or grey
- Cover butler
- Sony CD/AM/ FM stereo (XM ready)
- Sony 6 disc CD changer
- Foot dome geyser jets in several models

BADU Jets

The Endless Swimming Machine

The Olympic Swim Spa

The serious swimmer's dream delight! Over 15 1/2 feet long, with dual BaduStream swim jets and Sunbelt's unique Swim Lane System of side jets, the Olympic is tailor-made for the swimming enthusiast. The BaduStream jets create currents from a gentle flow — perfect for water jogging and resistance exercises — up to a 400 GPM rush that will give serious recreational swimmers a chance to really let out their stroke. As experienced swimmers know, one of the challenges is “staying in your lane.” Differences in side strength and stroke patterns create a tendency to pull to one side or another. Sunbelt's unique Swim Lane System keeps you “in the groove” with 16 side thrust jets that keep you centered in the swim lane. After a good swim, relax with a soothing massage in one of the two multi-jet Captain's Chairs at the spa end.

- 15' 7" x 8' 1" x 53" • 15 massage jets
- 16 swim lane side jets • 2 BADU swim current jets
- 2-5HP Massage Pumps (Dual Speed)
- 4HP Speck Swim Pump • Balboa Controls
- Ozonator • Dual Lights

"BADU Swim Jets Combined with 4HP Speck Pump can move 5000 gallons of water a minute"
— Tony, Speck Pumps

Swim Spas

Swimming, water jogging, aqua aerobics and resistance exercises are all great cardiovascular workouts, and they're about as low-impact as you will find. Combine these fitness benefits with the lowered blood pressure, improved circulation, and deep muscle relaxation of aqua massage therapy, and you've got the fabulous Sunbelt Swim Spa.

Sunbelt Swim Spas come in three models:

The Olympic — For the swimming enthusiast. An extended swim area and special swim lane features for the dedicated swimmer.

The Luxury — Seats 6 in the extended spa section, with generous workout room in the swim section.

The Family — A veritable party spa for the whole family (or any large group), with continuous step seating on three sides for “splash'n'play” family fun, and powerful swim jets for solo exercise.

The Luxury Swim Spa

A pair of back-and-hip massage Captain's Chairs and 4 contoured massage seats line the aqua therapy end of the Luxury — 23 jets of pure pleasure! Down at the business end, 4 powerful swim jets supply the adjustable current for everything from low-impact aqua aerobics to a challenging straight-line swim for endurance.

- 14' 7" x 8' 1" x 53" • 23 massage jets • 4 swim current jets
- 14 Air Jets • 2-5HP Massage Pumps (Dual Speed)
- 2-5HP Swim Pumps (Single Speed) • 1.5-HP Air Blower
- Balboa Controls • Ozonator • Aromatherapy • Dual Lights

The Family Swim Spa

The emphasis is on a spacious, bubbly play area with continuous step seating around three sides, and a swim area at the end. This is an excellent spa for teaching youngsters how to swim, with room for parents and coaches to guide and supervise while the small fry learn their strokes.

This is also a great party spa where there's always "room for one more!" The continuous step-style bench seating makes it easy to keep the people circulating, while the 28 therapy jets and the 4 powerful swim jets keep the water circulating. And when you're in the mood for some serious swimming, turn the therapy jets down and the swim jets up for a "let out your stroke" swim session that exercises, tones and invigorates.

- 14'10" x 8'2" x 53" • 4 Waterway Swim Jets • 28 Therapy Jets
- 2 Lights • Balboa Controls
- 4-5HP pumps, (2 dual-action, 2 single-action)
- 2 Simplex Controls • 1.5-HP Air Blower
- 6 Air Controls • Ozonator • Aromatherapy

In-Ground Series - Spillover Spas

While any Sunbelt Spa can be plumbed and installed as in-ground units upon request, we highlight here, special spas specifically designed as companions to an in-ground swimming pool. With a Sunbelt Spillover Spa, you add both aqua therapy massage and a gorgeous waterfall to your pool.

These spas have special pumps and plumbing that allow them to circulate pool water. These spas are constantly "filling up" with pool water, which flows back into the pool in a waterfall through the spillover channel.

Special features include: dual level seating, lumbar support recessed jets, inground light niche, air turbocharged jet, and an extra-wide rim for custom placement of flagstone or decorative decking. Note that these spillover spas are made of real, stain-resistant cast acrylic, unlike others made of ABS plastic which stains badly over time. Spillover spas contain "Real Spa Jets" — Adjustable rotating massage jets. Not concrete jets.

Poolside Lounge Spillover Spa

7' 10" x 7' 10" x 37"
Seats 6-7 people • Lounge
14 Rotating Therapy/Massage jets
14 Air Blower Injectors

300 gallons • 10 & 20 jet models

Our Promise to you

Here at Sunbelt, we don't just make spas, we own them and use them. When we add another feel-good feature to our spas, we know it really does feel good because we've felt it for ourselves. Just like you, we have our daily share of aches and pains, and when we say a Sunbelt Spa soothes the body, we can say it with confidence because we've been soothed ourselves. Other spas makers are portable spa factories with limited options. We are a real life spa provider — building *your* spa for *your* lifestyle.

At Sunbelt Spas, we are committed to providing you with the ultimate hydrotherapy experience. A treat for body and mind, a treatment for aches and pains. Swirling aqua-massage, aroma therapy, stereo sound, and lighting to suit your mood ... we engage all the senses to give you full-body, full-mind stress relief that rejuvenates, exuberates, and leaves a heavenly, "good all over" feeling that lasts and lasts. Nothing else that feels so good is so good for you.

A Sunbelt Spa adds pleasure to your life, benefits to your health, and value to your home. We make them better to satisfy us, the better to satisfy you.
